Emerging Professional	Nisreen Atta, MSN-ED, RN <i>Wisconsin</i>
Chief Executive Officer	Nancy MacRae, MS <i>Illinois</i>
Parliamentarian	Michael Taliercio
Legal Counsel	Kimberly Pendo

GENERAL ASSEMBLY

Standing Rules of Procedure of the ENA General Assembly

GENERAL

1. The General Assembly Standing Rules of Procedure may be suspended by a majority vote or amended or rescinded by a two-thirds vote. If notice of the proposed action was given in the call for the meeting, they may be amended or rescinded by a majority vote.
2. Delegates and alternate delegates shall wear name badges designating their delegate status.

RESOLUTIONS

3. Resolutions may be authored and submitted by the ENA Board of Directors, ENA committees, the *Journal of Emergency Nursing* Editorial Board, a state council or chapter, or by a voting ENA member.
4. The submission deadline for resolutions shall be May 23, 2023.
5. The General Assembly may consider resolutions received after the published deadline and by a two-thirds vote, provided all other criteria have been met. Notice of such resolutions shall be sent to state captains.

COMPOSITION

6. State council delegates shall be apportioned based on the ratio of members in the state or territory to the total ENA membership as of May 15 in accordance with the ENA Bylaws. International delegates shall be allocated in accordance with the ENA Bylaws. ENA headquarters will send necessary information for designating delegates, alternate delegates and state captains to state councils.
7. Each state council must formally register delegates and alternate delegates with the ENA headquarters no later than noon Central time on September 18, 2023.
8. The state captain shall be selected as soon as possible but no later than 75 days prior to the General Assembly (i.e., on or before July 7, 2023)
9. The ENA Immediate Past President shall oversee the credentials process.
10. A keypad will be assigned to each delegate. Delegates are responsible for checking out their own keypad. Delegates may not give their keypad to another delegate to cast their vote.
11. A member registered as an alternate delegate may be transferred to delegate status, provided that no state delegation exceeds the maximum number of delegates allotted. The state captain shall sign

authorizations to change delegates' status. A delegate who turns over his or her duties to an alternate delegate must report to the keypad desk with the alternate to exchange keypads. If the delegate wishes to resume his or her duties, the keypads must be exchanged in the same way.

12. Delegates and alternates shall attend all General Assembly meetings and complete the post General Assembly evaluation in order to receive a certificate of service.

REFERENCE HEARINGS

13. The author (or their designee) of a resolution or bylaw amendment proposal will present, via video, their resolution/proposal at the Reference Hearing for up to two (2) minutes. Such time will not be counted in the total time for discussion.
14. The Resolutions Committee shall determine the order of consideration of action items (except subsidiary amendments) that have been submitted for the second day of General Assembly. Delegates may change this order by a two-thirds vote.
15. Amendments to resolutions or Bylaws proposals must be submitted in accordance with the deadline set by the chair of the General Assembly. Amendments not submitted by the deadline shall require a non-debatable two-thirds vote to consider and a two-thirds vote to adopt.
16. Amendments to proposals shall be made available to the delegates as soon as possible after the amendments have been processed by the Resolutions Committee following the reference hearings.

DEBATE

17. The Resolutions Committee will determine the order in which the General Assembly will consider, debate and vote on resolutions and bylaw amendment proposals.
18. After being recognized, delegates and ENA past presidents shall give their name and affiliation before beginning to speak.
19. A delegate may request that an individual without speaking rights be allowed to speak. A majority vote shall be required to grant the request.
20. The author or designee shall be given the right to speak first for up to two minutes; such time shall not be counted in the total time for debate.
21. Within the allotted debate time, a delegate may speak for up to two minutes when recognized to speak on a main motion and up to one minute when recognized to speak on any other debatable motion.
22. Debate will alternate "pro" and "con," as much as possible, and each delegate shall be allowed only one turn to speak in each queue. If an amendment or other debatable motion is made that takes priority over the pending question, the existing queue will be saved and a new queue will be opened.

Once that priority motion is completed, the previous queue will be reopened and debate will resume on the pending question.

23. The total debate time allotted for each Bylaws amendment proposal and resolution shall be 10 minutes. If there are speakers in the queue when the debate time expires, the chair shall take a vote on whether to extend debate for an additional five minutes.

ADMINISTRATIVE

24. The Resolutions Committee shall be authorized to correct article and section designations, punctuation and references in the Bylaws, Election Rules, and General Assembly Standing Rules of Procedure as may be necessary to reflect the intent of the General Assembly.
25. Following the conclusion of General Assembly, the draft General Assembly minutes shall be sent electronically to all state captains and the ENA Board of Directors for a 10-day review and comment period. The minutes shall be subsequently approved by the Resolutions Committee.
26. The status of resolutions adopted by the General Assembly will be made available to the ENA membership through ENA publications and the [General Assembly website](#).

Proposal to Amend Bylaws

1 **Proposal Number:** GA23-01

2
3 **Title:** Membership Categories

4
5 **Article and Section:** Article III: Members Section 2: Classifications and Criteria

6 Article V: Meetings: Section 1: General Assembly

7
8 **Current bylaws language:**

9
10 **ARTICLE III; Members: Section 2**

11
12 46 Section 2. Classifications and Criteria. Membership may be granted to any individual who (i)
13 47 abides by these bylaws, the ENA Code of Ethics, and such other policies, rules and regulations
14 48 as ENA may adopt; and (ii) meets the criteria for membership set forth in one of the following
15 49 categories:

16 50 A. A. Voting Members – voting members shall be classified as national, international, senior,
17 51 and military (“Voting Members”). Only licensed (or the equivalent thereto) professional
18 52 registered nurses are eligible to be Voting Members. Voting Members shall have the right to
19 53 vote, hold elected office, serve on the Board of Directors, serve on committees, and attend
20 54 ENA’s meetings and social functions.

21 55 1. National membership may be granted to any individual who is a professional registered
22 56 nurse licensed in the United States or its territories.

23 57 2. International Membership may be granted to any individual who is a professional
24 58 registered nurse licensed (or the equivalent thereto) outside of the United States or its
25 59 territories.

26 60 3. Senior membership may be granted to a licensed (or the equivalent thereto) professional
27 61 registered nurse who is age 65 or older.

28 62 4. Military membership may be granted to a professional registered nurse licensed in the
29 63 United States or its territories who is currently serving or has been honorably discharged
30 64 or retired from the United States Armed Forces including Army, Navy, Marine Corps, Air
31 65 Force, Coast Guard, and Reserve Components.

32 66 B. Nonvoting Members – nonvoting members shall be classified as affiliate, student and
33 67 honorary (“Nonvoting Members”). Nonvoting Members shall be entitled to serve on ENA
34 68 committees and attend ENA member meetings and social functions.

35 69 1. Affiliate membership may be granted to any individual who shares interest in and
36 70 supports the purpose, mission and objectives of ENA but does not otherwise meet the
37 71 criteria for voting membership in ENA.

38 72 2. Student membership may be granted to any individual enrolled in a primary nursing
39 73 education program leading to eligibility for licensure as a professional registered nurse.

40 74 3. Honorary membership may be awarded to an individual meeting such criteria as shall be
41 75 determined by the president and the Board of Directors.

42
43 **ARTICLE V: Meetings: Section 1: General Assembly**

44
45 187 Section 1. General Assembly

46 188 A. The General Assembly shall be composed of delegates from states territories, federal
47 189 districts, and international delegates representing the international members.

Proposal to Amend Bylaws

Proposed changes:

Article III: Section 2

Section 2. Classifications and Criteria. Membership may be granted to any individual who (i) abides by these bylaws, the ENA Code of Ethics, and such other policies, rules and regulations as ENA may adopt; and (ii) meets the criteria for membership set forth in one of the following categories:

~~A. A. Voting Members – voting members shall be classified as national, international, senior, and military (“Voting Members”).~~ Only licensed (or the equivalent thereto) professional registered nurses are eligible to be Voting Members. Voting Members shall have the right to vote, hold elected office, serve on the Board of Directors, serve on committees, and attend ENA’s meetings and social functions.

~~1. National membership may be granted to any individual who is a professional registered nurse licensed in the United States or its territories.~~

~~2. International Membership may be granted to any individual who is a professional registered nurse licensed (or the equivalent thereto) outside of the United States or its territories.~~

~~3. Senior membership may be granted to a licensed (or the equivalent thereto) professional registered nurse who is age 65 or older.~~

~~4. Military membership may be granted to a professional registered nurse licensed in the United States or its territories who is currently serving or has been honorably discharged or retired from the United States Armed Forces including Army, Navy, Marine Corps, Air Force, Coast Guard, and Reserve Components.~~

~~B. Nonvoting Members – nonvoting members shall be classified as affiliate, student and honorary (“Nonvoting Members”).~~ **Nonvoting membership may be granted to any individual who shares interest in and supports the purpose, mission and objectives of ENA, but does not otherwise meet the criteria for voting membership in ENA.** Nonvoting Members shall be entitled to serve on ENA committees and attend ENA member meetings and social functions.

~~1. Affiliate membership may be granted to any individual who shares interest in and supports the purpose, mission and objectives of ENA but does not otherwise meet the criteria for voting membership in ENA.~~

~~2. Student membership may be granted to any individual enrolled in a primary nursing education program leading to eligibility for licensure as a professional registered nurse.~~

~~3. Honorary membership may be awarded to an individual meeting such criteria as shall be determined by the president and the Board of Directors.~~

Article V: Meetings: Section 1: General Assembly

Section 1. General Assembly

A. The General Assembly shall be composed of delegates from states territories, federal districts, and ~~international delegates~~ **those members** representing the international membership.

Proposal to Amend Bylaws

97
98
99

100 **Bylaws language if adopted:**

101
102
103

Article III: Section 2

104 Section 2. Classifications and Criteria. Membership may be granted to any individual who (i)
105 abides by these bylaws, the ENA Code of Ethics, and such other policies, rules and regulations
106 as ENA may adopt; and (ii) meets the criteria for membership set forth in one of the following
107 categories:

- 108 A. Voting Members – Only licensed (or the equivalent thereto) professional registered nurses are
109 eligible to be Voting Members. Voting Members shall have the right to vote, hold elected office,
110 serve on the Board of Directors, serve on committees, and attend ENA’s meetings and social
111 functions.
- 112 B. Nonvoting Members – Nonvoting membership may be granted to any individual who shares interest
113 in and supports the purpose, mission and objectives of ENA, but does not otherwise meet the criteria
114 for voting membership in ENA. Nonvoting Members shall be entitled to serve on ENA committees
115 and attend ENA member meetings and social functions.

116
117

Article V: Section 1

118
119

Section 1. General Assembly

- 120 A. The General Assembly shall be composed of delegates from states territories, federal
121 districts, and those members representing the international membership.

122
123
124

Rationale:

125 Over the last few years, we have spent many hours as a delegation discussing member categories. This time is
126 exponentially larger if you take into consideration the time spent by the authors, the Resolutions Committee, the
127 Board of Directors, legal counsel, and the time spent by individual state delegations. Currently, we only have two
128 main categories. Members in ENA can only be voting or non-voting members.

129
130

131 The only benefit afforded to subsets of these categories is a discounted rate on their membership dues. As a
132 delegation, we do not set the rates for member dues. Although it is honorable to identify and recognize each
133 individual sub group, this does not need to be called out in the bylaws of our organization. In addition, this
134 increases the flexibility of creating additional subcategories as we do not need to amend the bylaws in order to
135 include potential additional groups.

136

137 Based on our discussion with ENA headquarters:

138

- 139 • The rationale for this amendment is best described as clarifying and preserving the intent of Section 2,
140 while removing barriers to growth, engagement, and inclusion. We aspire to support emergency nurses
141 globally at all career stages.
- 142 • ENA currently has 7 categories of membership defined in the Bylaws Article III Section 2. These
143 include 10 different annual prices (excluding state council surcharges) with 2 dues rates for Students and
144 2 dues rates for international members.

Proposal to Amend Bylaws

- 145
- 146
- 147
- 148
- 149
- 150
- 151
- 152
- 153
- 154
- 155
- 156
- 157
- 158
- 159
- ENA is implementing a new set of 3 additional dues rates for recently graduated nurses that are applicable to current National, International, and Military member categories defined in the bylaws, which would bring the potential dues rates listed to 19.
 - The benefits of membership for Voting member categories are identical. The benefits of membership for Non-Voting members are also identical.
 - For General Assembly Delegate apportionment, Article V does require identification of members by State Council and “international”.
 - The intent of Section 2 is clear – that as a nurse-founded and focused organization, voting and leadership should be limited to members who are “licensed (or the equivalent thereto) professional registered nurses”. Removing the membership subcategories from the bylaws does not change the intent of Section 2. However, their removal would allow ENA to simplify its marketing and communication around membership to non-members. These potential members currently see a list of options that has caused confusion. <https://www.ena.org/membership/membership-options>)

232 233 **Letter of Intent**

234 As authors of this bylaw amendment, we hope to simplify our current bylaws. Subsets of membership categories
235 and recognized membership discount should be set by the national office and does not need to be debated by the
236 General Assembly.

237
238 As we drafted this amendment, we also considered international members. Please note that some of our authors
239 are international members.

Proposal to Amend Bylaws

1 **Proposal Number:** GA23-02

2
3 **Title:** Expanding Councils for International Inclusivity

4
5 **Article and Section:** Article VIII Sections 1-3

6
7 **Current bylaws language:**

8 Section 1. State Councils

9 Voting Members of ENA who are licensed or reside within a particular state, commonwealth, federal district,
10 territory or possession of the United States (the “territory”) may be organized as a constituent of ENA (each of
11 which is referred to as a “State Council”). The Board of Directors may authorize the establishment of State
12 Councils which shall:

- 13 i. be organized and operated in accordance with these Bylaws, and such additional rules, regulations
14 and policies as may be adopted by the Board of Directors from time to time;
- 15 ii. fulfill criteria for affiliation as may be established by the Board of Directors from time to time;
- 16 iii. enter into charter agreements with ENA, as determined by ENA;
- 17 iv. be issued a charter by ENA; and
- 18 v. organize and conduct their activities in such a manner as to establish its fundamental alignment and
19 functional compatibility with ENA.

20
21 A. State Council’s general purposes and objectives shall be complementary and consistent, on a local basis
22 within its territory, with those of ENA and the State Council will advance the general and specific purposes of
23 ENA within its territory. All members of a State Council must be members of ENA in good standing.

24
25 Section 2. Application for Recognition as a State Council

26 The Board of Directors, or its designee(s) shall adopt an application form and procedures to facilitate the
27 consideration of applicants seeking to be organized as a State Council. All applicants must complete the
28 application form and submit the application, along with the designated fee, if any, to ENA’s administrative
29 office. The Board of Directors or its designee(s), shall review the application of all applicants and determine,
30 based on the criteria set forth in these bylaws and such other guidelines as the Board of Directors may prescribe,
31 if applicants meet the qualifications necessary for recognition as a State Council.

- 32
33 A. Charters for the operation of State Councils may be revoked by the Board of Directors according to due
34 process procedures established by the Board of Directors. Upon revocation of a State Council’s charter,
35 the State Council immediately shall remit all of its funds (after satisfying any existing debts or
36 obligations) and records to ENA national office.
- 37 B. No State Council or other entity shall use ENA’s name or trademarks in any manner whatsoever unless
38 duly authorized to do so by ENA pursuant to the terms of a written agreement or policy.
- 39 C. ENA shall fund chartered State Councils pursuant to a formula determined by the Board of Directors
40 based on the State Council’s membership.
- 41 D. Each State Council shall be incorporated as a not-for-profit corporation, have a Board of Directors,
42 officers and bylaws in such form as shall be approved by the Board of Directors or its designee(s). State
43 Councils must maintain voting membership categories and criteria that are identical to ENA’s. Any
44 changes to a State Council’s bylaws require the prior written approval of the Board of Directors, or its
45 designees(s).
- 46 E. Each State Council may hold such meetings as it deems appropriate.
- 47 F. Members may belong to only one State Council.
- 48 G. A member of a State Council may transfer to another State Council by written request to ENA.

Proposal to Amend Bylaws

49

50

Section 3. Local Chapters

51

Voting members of the same State Council that are licensed or reside within the same local geographical territory may be organized as a local chapter by the State Council and each such local chapter will be an integral part of such State Council (i.e., it shall operate and function as a committee or special interest group of the State Council) (each of which is referred to as a “Local Chapter”). The name, boundaries, eligibility requirements for Local Chapters, and policies and procedures governing their operations, shall be determined by the State Council, subject to the prior written approval of the Board of Directors, and such rules and policies as may be adopted by the Board of Directors from time to time. A State Council is responsible for overseeing and managing the activities of its Local Chapters and shall have the right to disband or dissolve any Local Chapter it creates, with appropriate due cause.

59

Proposed changes:

61

Section 1. ~~State~~ Councils

62

Voting Members of ENA who are licensed or reside within a ~~particular state, commonwealth, federal district, territory or possession of the United States~~ **clearly defined region, country, state, province, or other geographical area** (the “territory”) may be organized as a constituent of ENA (each of which is referred to as a ~~“State Council”~~).

65

The Board of Directors may authorize the establishment of ~~State~~ Councils which shall:

66

- i. be organized and operated in accordance with these Bylaws, and such additional rules, regulations and policies as may be adopted by the Board of Directors from time to time;
- ii. fulfill criteria for affiliation as may be established by the Board of Directors from time to time;
- iii. enter into charter agreements with ENA, as determined by ENA;
- iv. be issued a charter by ENA; and
- v. organize and conduct their activities in such a manner as to establish its fundamental alignment and functional compatibility with ENA.

73

74

A. ~~State~~ Council’s general purposes and objectives shall be complementary and consistent, ~~on a local basis within its territory,~~ with those of ENA and the ~~State~~ Council will advance the general and specific purposes of ENA within its territory. All members of a ~~State~~ Council must be members of ENA in good standing.

77

78

Section 2. Application for Recognition as a ~~State~~ Council

79

The Board of Directors, or its designee(s) shall adopt an application form, **criteria,** and procedures **for application review** to facilitate the consideration of applicants seeking to be organized as a ~~State~~ Council and **approve those who meet the qualifications.** ~~All applicants must complete the application form and submit the application, along with the designated fee, if any, to ENA’s administrative office.~~ The Board of Directors or its designee(s), shall review the application of all applicants and determine, based on the criteria set forth in these bylaws and such other guidelines as the Board of Directors may prescribe, if applicants meet the qualifications necessary for recognition as a ~~State~~ Council.

86

87

~~C. A.~~ ENA shall fund chartered ~~State~~ Councils pursuant to a formula determined by the Board of Directors ~~based on the State Council’s membership.~~

88

~~D. B.~~ Each ~~State~~ Council shall be incorporated as a not-for-profit corporation (**or the equivalent thereto**), have a Board of Directors, officers and bylaws in such form as shall be approved by the Board of Directors or its designee(s) **consistent with applicable local laws and regulations in the country of incorporation.** ~~State~~ Councils must maintain voting membership categories and criteria that are identical to ENA’s. Any changes to a ~~State~~ Council’s bylaws require the prior written approval of the Board of Directors, or its designees(s).

94

~~E. C.~~ Each ~~State~~ Council may hold such meetings as it deems appropriate.

96

Proposal to Amend Bylaws

97 F. ~~D.~~ Members may belong to only one ~~State~~ Council.

98 G. ~~E.~~ A member of a ~~State~~ Council may transfer to another ~~State~~ Council by written request to ENA.

99 A. ~~F.~~ Charters for the operation of ~~State~~ Councils may be revoked by the Board of Directors according to
100 due process procedures established by the Board of Directors. Upon revocation of a ~~State~~ Council's
101 charter, the ~~State~~ Council immediately shall remit all of its funds (after satisfying any existing debts or
102 obligations) and records to ENA ~~national office~~.

103 B. ~~G.~~ No ~~State~~ Council or other entity shall use ENA's name or trademarks in any manner whatsoever
104 unless duly authorized to do so by ENA pursuant to the terms of a written agreement or policy.

105 106 Section 3. ~~Local~~ Chapters

107 Voting members of the same ~~State~~ Council that are licensed or reside within the same ~~local geographical~~ territory
108 may be organized as a ~~local chapter~~ by the ~~State~~ Council and each such ~~as a local chapter~~ (each a "Chapter").
109 **Each Chapter** will be an integral part of ~~such State~~ **the** Council (i.e., it shall operate and function as a committee
110 or special interest group of the ~~State~~ Council) (each of which is referred to as a "Local Chapter"). The name,
111 boundaries, eligibility requirements for ~~Local~~ Chapters, and policies and procedures governing their operations,
112 shall be determined by the ~~State~~ Council, subject to **applicable local laws**, the prior written approval of the
113 Board of Directors, and such rules and policies as may be adopted by the **Council or** Board of Directors from
114 time to time. A ~~State~~ Council is responsible for overseeing and managing the activities of its ~~Local~~ Chapters and
115 shall have the right to disband or dissolve any ~~Local~~ Chapter it creates, with appropriate due cause.
116

117 118 **Bylaws language if adopted:**

119 120 Section 1. Councils

121
122 Voting Members of ENA who are licensed or reside within a clearly defined region, country, state, province, or
123 other geographical area (the "territory") may be organized as a constituent of ENA (each of which is referred to
124 as a "Council"). The Board of Directors may authorize the establishment of Councils which shall:

- 125 i. be organized and operated in accordance with these Bylaws, and such additional rules, regulations
126 and policies as may be adopted by the Board of Directors from time to time;
- 127 ii. fulfill criteria for affiliation as may be established by the Board of Directors from time to time;
- 128 iii. enter into charter agreements with ENA, as determined by ENA;
- 129 iv. be issued a charter by ENA; and
- 130 v. organize and conduct their activities in such a manner as to establish its fundamental alignment and
131 functional compatibility with ENA.

132
133 A. Council's general purposes and objectives shall be complementary and consistent with those of ENA and the
134 Council will advance the general and specific purposes of ENA within its territory. All members of a Council
135 must be members of ENA in good standing.

136 137 Section 2. Application for Recognition as a Council

138
139 The Board of Directors, or its designee(s) shall adopt an application form, criteria, and procedures for application
140 review to facilitate the consideration of applicants seeking to be organized as a Council and approve those who
141 meet the qualifications. The Board of Directors or its designee(s), shall review the application of all applicants
142 and determine, based on the criteria set forth in these bylaws and such other guidelines as the Board of Directors
143 may prescribe, if applicants meet the qualifications necessary for recognition as a Council.
144

Proposal to Amend Bylaws

- 145 A. ENA shall fund chartered Councils pursuant to a formula determined by the Board of Directors.
 146 B. Each Council shall be incorporated as a not-for-profit corporation (or the equivalent thereto), have a
 147 Board of Directors, officers and bylaws in such form as shall be approved by the Board of Directors or
 148 its designee(s) consistent with applicable local laws and regulations in the country of incorporation.
 149 Councils must maintain voting membership categories and criteria that are identical to ENA's. Any
 150 changes to a Council's bylaws require the prior written approval of the Board of Directors, or its
 151 designees(s).
 152 C. Each Council may hold such meetings as it deems appropriate.
 153 D. Members may belong to only one Council.
 154 E. A member of a Council may transfer to another Council by written request to ENA.
 155 F. Charters for the operation of Councils may be revoked by the ENA Board of Directors according to
 156 due process procedures established by the Board of Directors. Upon revocation of a Council's charter,
 157 the Council immediately shall remit all of its funds (after satisfying any existing debts or obligations)
 158 and records to ENA.
 159 G. No Council or other entity shall use ENA's name or trademarks in any manner whatsoever unless
 160 duly authorized to do so by ENA pursuant to the terms of a written agreement or policy.

162 Section 3. Chapters

164 Voting members of the same Council that are licensed or reside within the same territory may be organized by
 165 the Council as a chapter (each a "Chapter"). Each Chapter will be an integral part of the Council (i.e., it shall
 166 operate and function as a committee or special interest group of the Council). The name, boundaries, eligibility
 167 requirements for Chapters, and policies and procedures governing their operations, shall be determined by the
 168 Council, subject to applicable local laws, the prior written approval of the Board of Directors, and such rules and
 169 policies as may be adopted by the Council or Board of Directors from time to time. A Council is responsible for
 170 overseeing and managing the activities of its Chapters and shall have the right to disband or dissolve any Chapter
 171 it creates, with appropriate due cause.

174 **Rationale:**

175 We are submitting this Bylaw Amendment to further the resolved clauses of the adopted GA22-08 "International
 176 Inclusivity" Resolution, particularly "... enabling participation through the removal of geographical, cultural, and
 177 language barriers" (Peta, 2022). The proposed amendments empower non-US members to develop an equal
 178 voice with the full support of ENA, to self-govern and self-direct resources toward practice advancement specific
 179 to their unique needs and foster a direct connection between ENA and the growing non-US membership, further
 180 supporting inclusivity.

182 ENA has committed to advancing excellence and inclusivity to emergency nurses globally, most recently
 183 amending the Bylaws to allow members 65 or older access to "Senior" membership regardless of their country of
 184 residence (ENA, 2023). Leaders who embrace inclusivity harness the potential to build relationships, generate
 185 engagement and staff buy-in, increase performance, and enable positive health outcomes as well as a positive
 186 staff and patient experience (Morrison, 2021).

188 ENA's vision includes being "indispensable to the global community" and ensuring "emergency nurses globally
 189 have access to high quality education and resources to provide excellent care" (ENA, Strategic Plan, 2020). US
 190 States receive financial support from ENA to fund local operations. Without a similar structure, non-US ENA
 191 member groups do not receive similar support (ENA, Procedures, 2017).

Proposal to Amend Bylaws

193 In their “Global Strategic Direction for Nursing and Midwifery 2021-2025”, the World Health Organization cites
194 the need to “invest in leadership skills development” and engage nurses in various organizations to broaden their
195 skills and improve access to development opportunities (World Health Organization, 2021).

Letter of Intent

We are submitting this Bylaw Amendment to further the resolved clauses of the adopted GA22-08 "International Inclusivity" Resolution, particularly "... enabling participation through the removal of geographical, cultural, and language barriers" ([GA22-08](#)). ENA has committed to advancing excellence and inclusivity to emergency nurses globally, most recently amending the Bylaws to allow members 65 or older access to "Senior" membership regardless of their country of residence ([Article III Sec. 2](#)). non-US membership, further supporting inclusivity.

Proposal to Amend Bylaws

1 **Proposal Number:** GA23-03

2
3 **Title:** Leadership Development and Elections Committee

4
5 **Article and Section:** Article IX Committees Section 2: Standing Committees

6
7 **Current bylaws language:**

ARTICLE IX COMMITTEES

Section 1. Committees

10 ENA shall have committees appointed by the Board of Directors in sufficient numbers necessary to address
11 mission objectives, and positions of ENA. The President or an appointed board liaison, as well as the Chief Staff
12 Officer, shall serve as non-voting members of all committees, except the Nominations and Elections Committee
13 or as otherwise set forth below.
14

Section 2. Standing Committees

B. Other Standing Committees.

17 The Board of Directors may establish other standing committees to support ENA's purposes. Such
18 committees shall include, at a minimum, a Finance Committee, Resolutions Committee, and Nominations
19 and Elections Committee. If a standing committee has the authority of the Board of Directors, a majority of
20 its members must be comprised of Directors. Except otherwise set forth in these bylaws: the action
21 establishing a standing committee shall set forth the committee's purpose, authority and required
22 qualifications for membership on the committee;
23

- 24 i. the Board of Directors, or its designee(s), shall determine the composition of ENA's standing committee;
- 25 ii. at all meetings of any standing committee, a majority of the members thereof shall constitute a quorum
26 for the transaction of business;
- 27 iii. a majority vote by committee members present and voting at a meeting at which a quorum is present
28 shall be required for any action;
- 29 iv. vacancies in the membership of a standing committee shall be filled by appointments made in the same
30 manner as the original appointments to that committee;
- 31 v. the Board of Directors or its designee(s) shall develop and approve policies and procedures for the
32 operation of all standing committees. All such policies shall be subject to the approval of the Board of
33 Directors; and
- 34 vi. all standing committees shall report to the Board of Directors.

35
36
37 Nominations and Elections Committee.

1. Composition

- 38 a. The Nominations and Elections Committee shall consist of seven Voting Members elected to serve
39 on the Nominations and Elections Committee in the ENA national election: one member from each
40 of six regions who has not previously served on the Board of Directors, and one member who has
41 served on the Board of Directors. Nominations and Elections Committee members may only
42 represent the region in which they hold a voting membership.
- 43 b. The six regions shall be established by Nominations and Elections Committee policy. Each region
44 shall be composed of states with geographic proximity and relatively equal membership distribution.
- 45 c. A Nominations and Elections Committee chairperson shall be elected each year by the incoming
46 Nominations and Elections Committee.

2. Qualifications

- 47 a. Candidates must be a Voting Member in good standing and must have been a Voting Member during
48
49

Proposal to Amend Bylaws

- 50 each of the previous five years immediately prior to submitting their candidate application.
- 51 b. Candidates shall have served in an elected or committee position on the local, state or national level
- 52 within the previous five years.
- 53 c. Candidates must also have attended at least one ENA General Assembly within the previous three
- 54 years.
- 55 d. Members of the Nominations and Elections Committee may not run for or serve in any ENA board
- 56 position during their tenure on the Nominations and Elections Committee, and may not serve more
- 57 than two consecutive elected terms on the Nominations and Elections Committee.
- 58 3. Elections
- 59 a. Elections for the Nominations and Elections Committee shall be held annually. Members shall serve
- 60 for a three-year terms with terms beginning January 1 and ending on December 31, or until such
- 61 time as their successors are duly elected, qualified and take office. Voting Members shall be elected
- 62 to serve on the Nominations and Elections Committee each year.
- 63 b. All Voting Members shall have the opportunity to elect Nominations and Elections Committee
- 64 members by ballot from all regions. Candidates receiving the highest number of votes shall be
- 65 declared elected. In the event of a tie vote for a position on the committee, lots shall be drawn.
- 66 4. Overview
- 67 a. The Nominations and Elections Committee has general oversight of the national election. The
- 68 Committee shall solicit and mentor potential candidates and review national candidate applications.
- 69 b. The Nominations and Elections Committee will provide periodic updates to the Board of Directors
- 70 regarding the progress of their charges.
- 71 c. The Nominations and Elections Committee shall present a qualified slate of candidates to the Board
- 72 of Directors for its review and discussion prior to presenting the slate to the membership. Following
- 73 such review and discussion, the Nominations and Elections Committee shall present the slate to the
- 74 membership through publication in such ENA publications as determined by the Board of Directors
- 75 or its designee(s).
- 76 5. Vacancies
- 77 a. A vacancy in the chairperson position shall be filled by a majority vote of the Nominations and
- 78 Elections Committee.
- 79 b. A vacancy of a committee member shall be filled by the candidate who received the next highest
- 80 number of votes from that region or as the past board member in the most recently completed
- 81 election.
- 82 c. In the event of a committee member vacancy from an uncontested election, a qualified candidate
- 83 must be nominated and elected by the state council presidents of the region affected by the vacancy
- 84 according to the Nominations and Elections Committee election process, meeting the same
- 85 requirements set forth in the bylaws as any potential candidate.
- 86 d. The committee position may remain vacant as approved by the Nominations and Elections
- 87 Committee if less than six months remain of the unexpired term.
- 88

Proposed changes:

Section 1. Committees

91 ENA shall have committees appointed by the Board of Directors in sufficient numbers necessary to address

92 mission objectives, and positions of ENA. The President or an appointed board liaison, as well as the Chief Staff

93 Officer, shall serve as non-voting members of all committees, except the ~~Nominations~~ **Leadership Development**

94 and Elections Committee or as otherwise set forth below.

Section 2. Standing Committees

B. Other Standing Committees.

98 The Board of Directors may establish other standing committees to support ENA's purposes. Such

Proposal to Amend Bylaws

committees shall include, at a minimum, a Finance Committee, Resolutions Committee, and ~~Nominations~~ **Leadership Development** and Elections Committee. If a standing committee has the authority of the Board of Directors, a majority of its members must be comprised of Directors. Except otherwise set forth in these bylaws: the action establishing a standing committee shall set forth the committee's purpose, authority and required qualifications for membership on the committee;

- i. the Board of Directors, or its designee(s), shall determine the composition of ENA's standing committee;
- ii. at all meetings of any standing committee, a majority of the members thereof shall constitute a quorum for the transaction of business;
- iii. a majority vote by committee members present and voting at a meeting at which a quorum is present shall be required for any action;
- iv. vacancies in the membership of a standing committee shall be filled by appointments made in the same manner as the original appointments to that committee;
- v. the Board of Directors or its designee(s) shall develop and approve policies and procedures for the operation of all standing committees. All such policies shall be subject to the approval of the Board of Directors; and
- vi. all standing committees shall report to the Board of Directors.

~~Nominations~~ **Leadership Development** and Elections Committee.

1. Composition

- a. ~~The ~~Nominations~~ **Leadership Development** and Elections Committee shall consist of **up to eleven (11)** ~~seven~~ Voting Members elected to serve on the ~~Nominations~~ **Leadership Development** and Elections Committee in the ENA national election. ~~one member from each of six regions who has not previously served on the Board of Directors, and one member who has served on the Board of Directors. ~~Nominations and Elections Committee members may only represent the region in which they hold a voting membership.~~~~~~ **At least one-third (1/3) but not more than one-half (1/2) of the members of the Leadership Development and Elections Committee shall have served on the ENA Board of Directors within the ten (10) year period prior to their election to the Leadership Development and Elections Committee.**
- b. ~~The six regions shall be established by ~~Nominations and Elections Committee policy. Each region shall be composed of states with geographic proximity and relatively equal membership distribution.~~~~
- c. A ~~Nominations~~ **Leadership Development** and Elections Committee chairperson shall be elected each year by the incoming ~~Nominations~~ **Leadership Development** and Elections Committee.

2. Qualifications

- a. Candidates must be a Voting Member in good standing and must have been a Voting Member during each of the previous five years immediately prior to submitting their candidate application.
- b. Candidates shall have served in an elected or committee position on the local, state or national level within the previous five years. **Candidates with Board experience must have served on the ENA Board of Directors within the ten (10) year period prior to their election.**
- c. Candidates must also have attended at least one ENA General Assembly within the previous three years.
- d. Members of the ~~Nominations~~ **Leadership Development** and Elections Committee may not run for or serve in any ENA board position during their tenure on the ~~Nominations~~ **Leadership Development** and Elections Committee, and may not serve more than two consecutive elected terms on the ~~Nominations~~ **Leadership Development** and Elections Committee.

3. Elections ~~Terms~~

- a. ~~Elections for the ~~Nominations and Elections Committee shall be held annually.~~ Members shall serve for a three-year terms with terms beginning January 1 and ending on December 31, or until such~~

Proposal to Amend Bylaws

time as their successors are duly elected, qualified and take office. **The terms of the members of the Leadership Development and Elections Committee shall be staggered such that approximately 1/3 of the members of the committee are elected each year.** ~~Voting Members shall be elected to serve on the Nominations and Elections Committee each year.~~

- b. ~~All Voting Members shall have the opportunity to elect Nominations and Elections Committee members by ballot from all regions. Candidates receiving the highest number of votes shall be declared elected. In the event of a tie vote for a position on the committee, lots shall be drawn.~~

4. Elections

a. **Elections for the Leadership Development and Elections Committee shall be held annually.** All Voting Members shall have the opportunity to elect ~~Nominations~~ **Leadership Development** and Elections Committee members by ballot. ~~from all regions.~~ Candidates receiving the highest number of votes shall be declared elected. In the event of a tie vote for a position on the committee, lots shall be drawn.

4.5. Overview

- a. ~~The Nominations~~ **Leadership Development** and Elections Committee has general oversight of the national election. The Committee shall solicit and mentor potential candidates and review national candidate applications.
- b. ~~The Nominations~~ **Leadership Development** and Elections Committee will provide periodic updates to the Board of Directors regarding the progress of their charges.
- c. ~~The Nominations~~ **Leadership Development** and Elections Committee shall present a qualified slate of candidates to the Board of Directors for its review and discussion prior to presenting the slate to the membership. Following such review and discussion, the ~~Nominations~~ **Leadership Development** and Elections Committee shall present the slate to the membership through publication in such ENA publications as determined by the Board of Directors or its designee(s).

§ 6. Vacancies

- a. A vacancy in the chairperson position shall be filled by a majority vote of the ~~Nominations~~ **Leadership Development** and Elections Committee.
- b. A vacancy of a committee member shall be filled by the candidate who received the next highest number of votes ~~from that region or as the past board member~~ in the most recently completed election.
- c. In the event of a committee member vacancy from an uncontested election, **a qualified candidate will be appointed by the Board of Directors to fill the vacancy.** ~~must be nominated and elected by the state council presidents of the region affected by the vacancy according to the Nominations and Elections Committee election process, meeting the same requirements set forth in the bylaws as any potential candidate.~~
- d. The committee position may remain vacant as approved by the ~~Nominations~~ **Leadership Development** and Elections Committee if less than ~~six months~~ **one year** remains of the unexpired term.

All other references to the committee's name will be updated accordingly throughout the bylaws.

Bylaws language if adopted:

ARTICLE IX COMMITTEES

Section 1. Committees

ENA shall have committees appointed by the Board of Directors in sufficient numbers necessary to address

Proposal to Amend Bylaws

mission objectives, and positions of ENA. The President or an appointed board liaison, as well as the Chief Staff Officer, shall serve as non-voting members of all committees, except the Leadership Development and Elections Committee or as otherwise set forth below.

Section 2. Standing Committees

B. Other Standing Committees.

The Board of Directors may establish other standing committees to support ENA's purposes. Such committees shall include, at a minimum, a Finance Committee, Resolutions Committee, and Leadership Development and Elections Committee. If a standing committee has the authority of the Board of Directors, a majority of its members must be comprised of Directors. Except otherwise set forth in these bylaws: the action establishing a standing committee shall set forth the committee's purpose, authority and required qualifications for membership on the committee;

- i. the Board of Directors, or its designee(s), shall determine the composition of ENA's standing committee;
- ii. at all meetings of any standing committee, a majority of the members thereof shall constitute a quorum for the transaction of business;
- iii. a majority vote by committee members present and voting at a meeting at which a quorum is present shall be required for any action;
- iv. vacancies in the membership of a standing committee shall be filled by appointments made in the same manner as the original appointments to that committee;
- v. the Board of Directors or its designee(s) shall develop and approve policies and procedures for the operation of all standing committees. All such policies shall be subject to the approval of the Board of Directors; and
- vi. all standing committees shall report to the Board of Directors.

Leadership Development and Elections Committee.

1. Composition

- a. The Leadership Development and Elections Committee shall consist of up to eleven (11) Voting Members elected to serve on the Leadership Development and Elections Committee in the ENA national election.
- b. At least one-third (1/3) but not more than one-half (1/2) of the members of the Leadership Development and Elections Committee shall have served on the ENA Board of Directors within the ten (10) year period prior to their election to the Leadership Development and Elections Committee.
- c. A Leadership Development and Elections Committee chairperson shall be elected each year by the incoming Leadership Development and Elections Committee.

2. Qualifications

- a. Candidates must be a Voting Member in good standing and must have been a Voting Member during each of the previous five years immediately prior to submitting their candidate application.
- b. Candidates shall have served in an elected or committee position on the local, state or national level within the previous five years. Candidates with Board experience must have served on the ENA Board of Directors within the ten (10) year period prior to their election.
- c. Candidates must also have attended at least one ENA General Assembly within the previous three years.
- d. Members of the Leadership Development and Elections Committee may not run for or serve in any ENA board position during their tenure on the Leadership Development and Elections Committee and may not serve more than two consecutive elected terms on the Leadership Development and Elections Committee.

3. Terms

- a. Members shall serve for three-year terms with terms beginning January 1 and ending on December 31, or until such time as their successors are duly elected, qualified and take office. The terms of the

Proposal to Amend Bylaws

246 members of the Leadership Development and Elections Committee shall be staggered such that
247 approximately 1/3 of the members of the committee are elected each year.
248

249 4. Elections.

- 250 a. Elections for the Leadership Development and Elections Committee shall be held annually. All
251 Voting Members shall have the opportunity to elect Leadership Development and Elections
252 Committee members by ballot. Balloting may be by electronic means. Candidates receiving the
253 highest number of votes shall be declared elected. In the event of a tie vote for a position on the
254 committee, lots shall be drawn.
255

256 5. Overview

- 257 a. The Leadership Development and Elections Committee has general oversight of the national
258 election. The Committee shall solicit and mentor potential candidates and review national candidate
259 applications.
260 b. The Leadership Development and Elections Committee will provide periodic updates to the Board of
261 Directors regarding the progress of their charges.
262 c. The Leadership Development and Elections Committee shall present a qualified slate of candidates to
263 the Board of Directors for its review and discussion prior to presenting the slate to the membership.
264 Following such review and discussion, the Leadership Development and Elections Committee shall
265 present the slate to the membership through publication in such ENA publications as determined by
266 the Board of Directors or its designee(s).
267

268 6. Vacancies

- 269 a. A vacancy in the chairperson position shall be filled by a majority vote of the Leadership
270 Development and Elections Committee.
271 b. A vacancy of a committee member shall be filled by the candidate who received the next highest
272 number of votes.
273 c. In the event of a committee member vacancy from an uncontested election, a qualified candidate will
274 be appointed by the Board of Directors to fill the vacancy.
275 d. The committee position may remain vacant as approved by the Leadership Development and
276 Elections Committee if less than one year remains of the unexpired term.

277 **Rationale:**

278 As one of the largest specialty nursing associations, with an international scope and significant fiscal
279 responsibility ENA requires strong leadership competencies to lead our association, grow and advance the
280 profession and ensure ENA's voice matters and is respected.
281

282
283 Through a collaborative process between members of the ENA Board and the Nominations and Elections
284 Committee, the proposed changes to the ENA Bylaws are being made to ensure optimal processes are in place
285 for the development and selection of future leaders.
286

287 Redefining the committee as the Leadership Development and Elections Committee fully articulates the
288 committee's dual purpose of developing future leaders and overseeing the election. Best practice indicates the
289 importance of a dedicated group to ensure the development and availability of future leaders for the sustained
290 success of an organization. The expansion of the size of the committee to 11 ensures a larger group of committee
291 members who can execute the workload of the election process, while providing for a strategic approach to
292 recruitment, including identifying and cultivating potential talent. This would be accomplished in a phased
293 approach with 2 positions added in 2024 and 2 positions in 2025 to retain the appropriate cycle of terms for

Proposal to Amend Bylaws

294 committee tenure.

295

296 The elimination of the regional structure of the committee aligns with ENA's growth and commitment to
297 international inclusivity and the resolution passed by the assembly in the 2022 General Assembly. It expands the
298 candidate pool thereby allowing for greater diversity of candidates. The elimination of the restriction that only
299 one committee member can have prior board service expands the prior leadership expertise on the committee for
300 mentoring future leaders while ensuring an appropriate balance of past board members and those without prior
301 board service.

312

313 **Letter of Intent**

314 To position ENA for the future by strengthening the focus on leadership recruitment, development and selection
315 and increasing diversity and inclusivity.

Resolution GA23-04

TITLE: Virtual Option for All Future Emergency Nurses Association Conferences

Whereas, ENA began offering a virtual option of the national conference (Emergency Nursing 20XX) in 2020, which has continued annually (J. Garcia, personal communication, March 21, 2023);

Whereas, ENA began offering a virtual option for the Leadership Orientation in 2021, offered a hybrid program in 2022, but offered no virtual option in 2023 (J. Garcia, personal communication, March 21, 2023);

Whereas, attendance decreased significantly at Leadership Orientation from 2021 to 2023, with 723 registrants in 2021 (all virtual), 417 registrants in 2022 (313 in-person, 104 virtual), and 345 registrants in 2023 (all in-person) (J. Garcia, personal communication, March 21, 2023);

Whereas, these authors have found through communication and discussion with ENA members that cost of attending live, in-person conferences can be burdensome on the member (D. McDonald, personal communication, 2023); and

Whereas, ENA reported an increase in net assets of \$775,861 in 2020 and \$3,551,845 in 2021 (PFK Mueller, 2022, p. 30).

Resolved, ENA explore offering a virtual option (either live or asynchronous) to enhance global accessibility for all future national conferences with a pricing structure focused on affordability for ENA members (e.g. 20% of the in-person member registration rate); and

Resolved, ENA explore offering a virtual option (either live or asynchronous) to enhance state and chapter leader accessibility for all future leadership orientation meetings with a pricing structure focused on affordability for ENA's volunteer leaders (e.g. 20% of the non-complimentary in-person registration rate).

Resolution Background Information

While there were a number of negatives during the COVID-19 pandemic, one thing we gained from it was experience with virtual education and how we can reach our members when travel is not an option. Regardless of the reasons why our members and emergency nursing community cannot attend an education event in-person, we need to meet them where they are. We have an obligation to provide opportunities for everyone to grow professionally and have access to the high-quality education and training we offer. Furthermore, this enhances our global presence in our worldwide emergency nursing community, members of whom may not be able to attend our conference due to high travel costs.

Moreover, as it pertains to leadership orientation, we have an obligation to grow, train, sustain, and support our volunteer leaders. While there are certainly benefits to being in-person for leadership orientation, this is not possible, or even permitted, for all of our volunteer leaders down to the chapter level. Sending a single representative to leadership orientation can cost thousands and is cost-prohibitive for any state to financially support sending all of its leaders. Making the program available remotely and asynchronously enables all of our volunteer leaders to have access to the development programming and gives them the tools they need to succeed over the next year.

While the costs of offering these programs are a planning factor, the costs associated with virtual programming are reasonable, and ENA is certain to see a return on investment by growing its stable of active, competent, and confident volunteer leaders.

Relationship to ENA Bylaws, Mission, Vision, and Strategic Initiatives

Ensuring the widest dissemination of our education programs to meet our members and nurses where they are aligns well with our core values of diversity and inclusion and excellence. Additionally, this proposal closely aligns with the value statement, "We place the highest value on our members for their contributions to the care of patients and their families, the emergency nursing profession, and our organization." Lastly, this proposal is in

Resolution GA23-04

52 direct alignment with all of our organizational goals, including our practice environment, education, community
53 and culture goals.

54 Ensuring there is no reason any of our members and/or worldwide emergency nursing community cannot access
55 our educational programming, whether it be due to a medical condition, socio-economic status, geographic
56 location, or other issues, is paramount to ensuring the fullest execution our strategic plan.

57

58 **Financial Consideration/Operations Impact**

59 The scope of work outlined in the resolved clauses has a fiscal impact greater than \$25,000. Upon final outcomes
60 of General Assembly, initiatives will be evaluated for resource planning in alignment with ENA's strategic plan
61 and operational goals.

106 **Letter of Intent**

107 The intent of this resolution is to ensure virtual components are offered at all future ENA conferences, both the

108 national conference and leadership orientation, to ensure maximum distribution of the educational and

109 professional development programs. We have the finances as an organization to support this and we need to

110 ensure all of our volunteer leaders are equipped with the tools to succeed.

Resolution GA23-05

TITLE: Infant Safe Haven Law Awareness and Alignment

Whereas, all 50 states have enacted Safe Haven laws (Children's Bureau of the United States Department of Health & Human Services (Children's Bureau), 2021);

Whereas, Safe Haven laws offer a safe alternative to abandonment (Children's Bureau, 2021);

Whereas, Safe Haven laws vary from state to state, but the hospital emergency department is an acceptable Safe Haven location in all states (Children's Bureau, 2021; Rousseau & Friedrichs, 2021); and,

Whereas, Safe Haven laws impact all emergency nurses (Rousseau & Friedrichs, 2021).

Resolved, That the ENA campaign to raise awareness of variability in state to state laws related to Safe Haven;

Resolved, That the ENA promote education for emergency nurses regarding state to state variability of Safe Haven laws and how these laws impact their practice in the state in which they work, or are licensed;

Resolved, That the ENA collaborate with other professional organizations such as the Association of Women's Health, Obstetric and Neonatal Nurses (AWOHNN) and the American College of Emergency Physicians (ACEP) to explore the impact of variability on patients and nurses.

Resolution Background Information

Global evidence of "baby boxes" or "baby hatches" can be found from ancient times to colonial France and into the modern day. In the United States (US), all 50 states, the District of Columbia, Guam, and Puerto Rico have enacted Safe Haven laws that allow for newborn or infant relinquishment, with Texas being the first in 1999 (Children's Bureau, 2021). The origins and requirements of "Safe Haven" laws (also known as "safe harbor" or "safe place for newborns") vary throughout the country.

Variations in these laws are expansive and include (Children's Bureau, 2021);

- the maximum age of the child who may be surrendered,
- who may leave the child and who may receive the child (also known as 'designated person' or 'provider'),
- where a child may be surrendered (including whether a baby box may be used),
- the responsibilities of the accepting provider,
- whether there is immunity from liability for the 'provider' that accepts the infant, and
- what protections are afforded to the parents or whether there are consequences associated with relinquishment.

One in-depth example of the above-noted variations describes who may surrender a child. In most states, either parent may surrender their baby to a Safe Haven location, while others specify that only a custodial parent or someone other than a parent with legal custody may surrender an infant. In some states, only the mother may relinquish her infant, and some allow an "agent of the parent" to relinquish an infant. Some states do not specify who can surrender a child (Children's Bureau, 2021).

Another detailed example provides an overview of designated locations to surrender a child. Safe Haven laws help ensure that designated locations can provide immediate care for infant safety and well-being. All states require parents to relinquish their infants only to specific locations. These locations vary from a hospital, an emergency department, emergency medical services providers, or a healthcare facility. Some states have

Resolution GA23-05

49 determined that fire stations, police stations, and churches are acceptable Safe Haven locations. Other states
50 specifically allow for the installation of approved "baby boxes" (Children's Bureau, 2021).

51
52 The overall intent of these laws is to provide a safe alternative to newborn harm and abandonment. Homicide
53 remains the 13th leading cause of infant mortality in the United States and is preventable (Wilson et al., 2020).
54 Since the implementation of Safe Haven laws in 1999, there have been approximately 4100 children legally
55 surrendered compared to 1900 illegally abandoned (Wilson et al., 2020). Of those illegally abandoned, an
56 estimated 855 died (Rousseau & Friedrichs, 2021).

57
58 With emergency departments designated as a Safe Haven location, emergency nurses may not be prepared to
59 receive an infant. Research shows that nurses may not feel prepared to receive a baby. Of 605 nurses in Texas
60 who responded to a survey about the Safe Haven Law soon after it was enacted in their state in 1999, 92%
61 reported feeling unprepared to receive an infant and scored an average of 40% on a test of knowledge about the
62 law (Rousseau & Friedrichs, 2021). There is not a standard measure of competency (Rousseau & Friedrichs,
63 2021) and there are currently no known ENA materials that address Safe Haven laws or the role of the
64 emergency nurse in this process.

65
66 **Relationship to ENA Bylaws, Mission, Vision, and Strategic Initiatives:**

67 The ENA's mission is to "advance excellence in emergency nursing". Emergency nurses should be the experts
68 regarding the Safe Haven laws in the state in which they practice. Emergency nurses should also be able to
69 advocate for changes to align Safe Haven laws across all states and territories.

70
71 **Financial Considerations/Operations Impact:**

72 The scope of work outlined in the resolved clauses has a fiscal impact less than \$10,000. Upon final outcomes of
73 the General Assembly, initiatives will be evaluated for resource planning in alignment with ENA's strategic plan
74 and operational goals.

Letter of Intent

123 The reversal of the Roe versus Wade supreme court decision has allowed each state to decide what level of
124 reproductive health services are permitted by law. This decision makes Safe Haven laws more critical to
125 supporting newborn and child safety. Safe Haven laws and variations in those laws impact all emergency nurses.
126 This resolution will bring awareness to the laws by state to help decrease confusion among emergency nurses
127 and the communities they serve.
128
129
130

Resolution GA23-06

TITLE: Education and Mitigation to Decrease Pediatric Window Falls

Whereas, emergency department and outpatient center surveillance systems suggest that falls are one of the most common injuries warranting medical care and the top mechanism of nonfatal injury requiring hospitalization (Gill & Kelly, 2023);

Whereas, between the year 2000 and 2020 unintentional falls were the leading cause of nonfatal injury in children from birth to 18 years old, accounting for nearly 1.3 million emergency department (ED) visits annually in the United States (CDC, n.d.). Children younger than five years of age are at the greatest risk of injury due to window falls, and those under one year of age are more likely to sustain a skull fracture or intracranial hemorrhage (Chaudhary et al., 2018; Farzaneh et al., 2021; Flaherty et al., 2021; Harris et al., 2011);

Whereas, window falls represent a small proportion of unintentional falls, the injuries sustained from window falls can be catastrophic and lead to long-term disability or death (Chaudhary et al., 2018; Farzaneh et al., 2021; Flaherty et al., 2021; Harris et al., 2011; Loftus et al., 2018);

Whereas, sociodemographic risk factors for window falls include male gender, low income, and population density (Flaherty et al., 2021; Gill & Kelly, 2023; Harris et al., 2011; James et al., 2020; McDonald et al., 2018). Environmental factors associated with window falls include time of day and time of year, as the risk increases when children are home from school and windows are open for natural ventilation (Harris et al., 2011; Sarkar et al., 2014);

Whereas, at one pediatric trauma center recent seven-year retrospective analysis found that of the 125 children that presented after falling from a window or balcony, more than half (62%) required hospitalization, for an estimated total cost of nearly \$14 million in healthcare spending for initial evaluation and treatment, not including follow up care; and

Whereas, policy development and enactment of interventions has been shown to be 95 % effective in preventing window falls (Pressley & Barlow, 2005; Spiegel & Lindaman, 1977; Smeh & Morton, 20—2019; Topriani et al., 2018.). Similar to a seatbelt, window locks should be as commonplace as booster seats and car seats, but are not (Betchel, 2021).

Resolved, that ENA’s ENA strategically disseminate educational materials that will help bridge this knowledge gap for our patients, caregivers, administrators, and policy makers, in order to raise awareness of the risk of and ways to prevent window falls; and

Resolved, that ENA collaborate with relevant organizations to identify and reduce barriers to support legislation around window safety and window fall prevention to improve equity and inclusion.

Resolution Background Information

Window falls are entirely preventable injuries. The risk to young children is not emphasized as a part of a regular discharge process in most facilities. Costs of deaths and injuries well outweigh the costs of the intervention (window locks).

Here are some facts:

- Families should also be made aware that window screens are designed to keep insects out and are not designed to withstand the force of a toddler leaning against the screen. Johnston et al. (2011) found that when tested, screens popped out of place from the static pressure of a 3-year-old leaning against the mesh.
- Children less than 5 years of age are more likely to be hospitalized or die from a window fall-related injury compared to those aged 5 to 17 years (Harris et al., 2011).
- Healthcare professionals and community health workers can increase public awareness that window falls are

Resolution GA23-06

- 52 preventable by providing information and resources to parents, caregivers, clinicians, community members,
 53 and policymakers (Meadows-Oliver, 2010; Smithson et al., 2011).
- 54 • The U.S. Consumer Product Safety Commission (CPSC) has advised caregivers to open windows less than 4
 55 inches when children are present as one tactic to prevent unintentional falls through open windows (CPSC,
 56 2015).
 - 57 • New York City (1976) and Boston (1993) enacted [“Children Can’t Fly” policies](#) requiring property owners
 58 to provide window guards for all multiple-story dwellings with children younger than 10 years of age,
 59 resulting in 96% and 95% reductions, respectively, in hospital admissions for window falls (Pressley &
 60 Barlow, 2005; Smeh & Morton, 2019; Spiegel & Lindaman, 1977; Topriani et al., 2018,).
 - 61 • Bechtel (2021) likened these public policy initiatives to automobile restraint (e.g., car seat, booster, or
 62 seatbelt) legislation, which has significantly reduced preventable mortality of children involved in motor
 63 vehicle crashes.
 - 64 • Montgomery County, Maryland enacted window safety legislation in 2021, effective on January 1, 2022.
 65 (Landlord–Tenant Relations — Window Guards , 2022; Montgomery County Council, 2020: Montgomery
 66 County Office of Legislative Oversight, 2020; 2020, December 14). [Bill 51-20](#) increased landlord
 67 responsibilities and rental property safety standards in the County. Bill 51-20 requires a landlord of a
 68 multifamily dwelling to install and maintain a window guard in each window of a habitable room if: (1) a
 69 child of age 10 or younger occupies the dwelling; or (2) a tenant of the dwelling requests in writing the
 70 installation of window guards.
 - 71 • December 2019, [H.R.3049](#), also known as Evan’s Law, was passed. Evan’s Law amended title 10, United
 72 States Code, to require the windows in military family housing units to be equipped with fall prevention
 73 devices that protect against unintentional falls by young children. This program extends across the United
 74 States and demonstrates the value of enforcing window safety through policy to protect children from harm
 75 and families from devastating consequences from unintentional window falls (115th Congress, 2019).
 - 76 • [New Jersey](#) passed an act enhancing existing regulations on child-protection window guards (Robert E.
 77 Dwight, Jr., Raquan Ilis, and Zahir Atkins Memorial Child-Protection Window Guard Law, 1995/ rev.2006).
 78 The New Jersey Apartment Association created guidelines to assist with the immediate implementation,
 79 including an analysis of changes to existing window safety regulations, frequently asked questions, and an
 80 implementation checklist (New Jersey Apartment Association, 2007).
 - 81 • [Minnesota’s Laela’s Law](#) ([Window Fall Prevention Device Code, 2007](#)), required the Minnesota Department
 82 of Health to create a safety program to raise awareness regarding falls through open windows by children
 83 and attending tactics to prevent these tragic falls.

84
 85 These last two bills demonstrate that implementing public health policy at the state level is possible and effective
 86 at preventing unintentional injury and death in our vulnerable pediatric population.

87 Education alone will not enable ENA to help with the changes needed to curb the causes of falls out of windows.
 88 It is important to note that both education and support of legislation, locally and nationally, are necessary for
 89 making the changes that are needed.

91 **Relationship to ENA Bylaws, Mission, Vision, and Strategic Initiatives**

92 As the organization seeks to increase excellence in emergency nursing, ENA needs to consider the civic duty to
 93 our constituents to decrease the secondary trauma of seeing these children after they have fallen. If we can step
 94 into the gap as an organization to educate about window falls we can also stand in the inequity gap and stop
 95 seeing these children falling out of windows. By having a statement in support of education and prevention
 96 concerning falls from windows we release our state and national bodies to take civic action and educate in a
 97 uniform manner the patients who arrive are our hospitals

99 **Financial Consideration/Operations Impact**

Resolution GA23-06

100 The scope of work outlined in the resolved clauses has a fiscal impact less than \$10,000. Upon final outcomes of
 101 General Assembly, initiatives will be evaluated for resource planning in alignment with ENA’s strategic plan and
 102 operational goals.

California State Council
Emergency Nurses Association

Letter of Intent

The purpose of this resolution is to bring attention to pediatric window fall prevention and to encourage engagement with strategic partners to increase legislative interventions locally and nationally. Many emergency departments are not supplying this education but witness the effects of the falls during the care that they render. The California State Chapter of the Emergency Nurses Association proposes this resolution to provide education support and strategic interventions to improve safe care of pediatric patients.

Resolution GA23-07

TITLE: The Emergency Nurses Association Exploring the Advancement of the Specialty of Geriatric Emergency Nursing

Whereas, the Emergency Nursing Association (ENA) recognizes and advocates for emergency nursing certification as a means to demonstrate continued commitment to the nursing profession, competence, and improvement of the quality of emergency nursing practice and patient outcomes (ENA, 2023);

Whereas, older adults have unique needs in the emergency department (ED) (Carpenter et al., 2014; Hwang et al., 2021);

Whereas, throughout the world, due to demographic changes, the general population is trending older (US Census, 2017);

Whereas, the geriatric emergency department (GED) model of care, Geriatric Emergency Department Guidelines, and the associated Geriatric Emergency Department Accreditation (GEDA) program were developed to meet the unique needs of older adults (American College of Emergency Physicians [ACEP], 2018; Carpenter et al., 2014; Hwang & Morrison, 2007);

Whereas, GEDA was first introduced in 2018 and has since grown to over 400 accredited GEDs in the United States and Internationally (ACEP, n.d.);

Whereas, the geriatric emergency department (GED) model of care is based on evidence-based practice delivered by an emergency department interprofessional team. The ED RN is a critical discipline in the GED model of care and requires specialized training (Wolf et al., 2019);

Whereas, ENA has a long history of supporting the geriatric nursing subspecialty by developing numerous resources to improve the care of older adults, for example, a tiered set of Geriatric Emergency Nursing Education (GENE) courses (Levels I–III), the Geriatric Emergency Department Readiness Toolkit that came out of resolution “GA17-06 Develop an Emergency Department Geriatric Readiness Survey and Toolkit,” establishment of the ENA Geriatric Committee, ENA initiated research on GED readiness and emergency nursing quality indicators, practice resources, and press releases (See the section “ENA Resources”);

Whereas, the value of board certification is the recognition of practice excellence and career achievement and is desired by both patients and employers. In 2022 the Board of Certification for Emergency Nursing (BCEN) had five active certifications and 58,927 certifications awarded (BCEN, 2022); and

Whereas, BCEN recognizes the pediatric population to have specialty emergency nursing practice needs via the Certified Pediatric Emergency Nurse (CPEN) certification, the emergency nursing specialty practice needs of the geriatric population should also be considered for certification. Board certification recognizes the achievement and sought-after mark of excellence for the individual nurse. Certification validates specialty knowledge and expertise that empowers the nurse to effect patient care, safety, and outcomes (BCEN, 2022).

Resolved, ENA will collaborate with all relevant external organizations such as BCEN, GEDC, ACEP, and GEDA to explore opportunities to advance education around the specialty of geriatric emergency nursing.

Resolution Background Information

The older adult population (65 years and older) in the U.S. is growing rapidly. By 2030, this population is projected to double to more than 82 million individuals (United States Census Bureau, 2017). As the population ages, emergency departments (EDs) will increasingly be challenged with the complexities and the volume of geriatric patients (Hwang, et al., 2021). In response to the unique needs of a growing geriatric population, the GED model of care was developed with ENA endorsement. In 2014, standardized GED guidelines were

Resolution GA23-07

published to improve and coordinate the delivery of care for geriatric patients (ACEP et al., 2014; Carpenter et al., 2014). In 2018, the American College of Emergency Physicians (ACEP) launched the GED Accreditation (GEDA) program for EDs in adherence to the guidelines (ACEP, 2018). Currently, there are more than 415 accredited GED internationally (ACEP, n.d.).

Concurrent with the rapid expansion and popularity of the GED model of care, the ENA consistently and robustly supported emergency nurse excellence in geriatrics. This is highlighted by the Geriatric Emergency Nurse Education (GENE) set of courses (Level I–Level III); the ENA Geriatric Emergency Department Readiness Toolkit; numerous press releases, topic briefs, and resolutions; the status change of the ENA Geriatric workgroup to a recognized committee in 2018, and ENA research). An ENA initiated study in 2019 (Wolf et al.) assessed the perceptions of emergency nurses’ geriatric readiness. As part of the study’s rationale Wolf et al. (2019) described the needs of older adults in the healthcare setting in the following way:

Vulnerable older adults have unique and complex care needs spanning medical, cognitive, emotional, social, and environmental domains. Older adults often present atypically, even with significant disease, requiring nurses to be vigilant in their assessment and initial interventions. In addition, signs and symptoms for various illnesses can be markedly different (or absent) in this population, requiring emergency nurses and other health care providers to have specialized training and education. Just as dedicated protocols and departments have advanced pediatric emergency care, development and continued refinement of the geriatric emergency care environment will be pivotal to the long-term prevention and mitigation of illness and injury in the elderly (p. 375).

The study highlighted the critical role of emergency nurses, numerous barriers, and guidance for organizations such as ENA to create an environment for nursing excellence in geriatric emergency care.

Given the increased utilization of the ED by older adults and the special skills required to address and manage their complex needs, ENA is uniquely positioned to develop a plan for certification in geriatric emergency nursing as a marker of emergency nursing excellence in the field of gerontology. In 2022 the Board of Certification for Emergency Nursing (BCEN) had 58,927 active certifications held, of which 5,419 are Certified Pediatric Emergency Nurses (BCEN, 2022). The pediatric population is significantly smaller than the current and projected geriatric population. We can expect increased health care utilization by these older adults (Cairns & Kang, 2022; Hunold et al., 2022).

This ENA resolution proposal tasks the ENA Geriatric Committee with exploring a pathway to develop and implement certification in geriatric emergency nursing. A plethora of resources have already been developed by this committee to help achieve certification success. The resolution specifically tasks the ENA Geriatric Committee with the following actions:

- Identifying and collaborating with key stakeholders
- Understanding the steps and requirements of seeking a certification in geriatric emergency nursing
- Aligning certification with GED accreditation
- Developing a plan to execute establishment of a certification in geriatric emergency nursing
- Identifying financial considerations and creating a budget

Key stakeholders may include BCEN, GEDA, ACEP, and the Geriatric Emergency Department Collaborative (GEDC). At the conclusion of the study, the ENA Geriatric Committee will present a report of the findings and recommendations to the ENA Board of Directors and/or General Assembly for consideration.

Relationship to ENA Bylaws, Mission, Vision, and Strategic Initiatives

ENA values of excellence, lifelong learning, and inclusion support the development of a certification in geriatric emergency nursing to prepare nurses who care for the vulnerable older adult population.

Resolution GA23-07

102 **Financial Considerations/Operations Impact**

103 The scope of work outlined in the resolved clauses has a fiscal impact between \$10,000-\$25,000. Upon final
104 outcomes of General Assembly, initiatives will be evaluated for resource planning in alignment with ENA's
105 strategic plan and operational goals.

235 **Letter of Intent**

236 The intention of this resolution is to leverage the expertise and advocacy of the ENA to lead an initiative to
 237 prepare, provide professional development resources, and recognize the nursing excellence in the geriatric
 238 emergency nursing subspecialty via the exploration and development of a plan to create a certification in
 239 geriatric emergency nurse certification. Furthermore, the goals of such a certification are to the following:

- 240 • Ensure practice excellence.
- 241 • Support emergency nurses' career development and life-long learning.
- 242 • Define the key attributes of geriatric emergency nursing practice.
- 243 • Standardize the education and preparation of emergency nurses that addresses the delivery of care provided
 244 to the older population when they are seeking emergency department services.
- 245 • Recognize or distinguish those who possess expert skills, experience, and knowledge in emergency geriatric
 246 care delivery.

Resolution GA23-08

TITLE: Management and Mitigation of Actual or Perceived Conflicts of Interest for Current and Future Volunteers of the Emergency Nurses Association

Whereas, The Emergency Nurses Association (ENA) is an Illinois not-for-profit corporation exempt from federal income tax pursuant to Section 501(c)(3) of the Internal Revenue Code of 1986, as amended, and ENA WorkWell Solutions, LLC, doing business as (DBA) Engage, Powered by ENA, is an Illinois limited liability company and is ENA's wholly owned, for-profit subsidiary;^{6, 7, 17}

Whereas, employees of ENA WorkWell Solutions, LLC, DBA Engage, Powered by ENA are also serving as volunteer leaders of ENA;^{6, 7, 12, 19}

Whereas, The practice of ENA WorkWell Solutions, LLC, DBA Engage, Powered by ENA employing ENA volunteers has created potential actual or perceived conflicts of interest;^{8, 9, 10, 11, 13, 14, 15, 16, 18, 20, 21, 22}

Whereas, The possibility of employment or other potential personal enrichment by ENA WorkWell Solutions, LLC, DBA Engage, Powered by ENA, ENA, or other future subsidiaries could influence decision-making by volunteers in leadership positions and adversely affect the diversity, equity, and inclusivity of ENA's work as well as the consistency and equity of conflict of interest management and mitigation for past, current, and future volunteers;^{2, 3, 8, 9, 10, 11, 13, 14, 15, 16, 18, 20, 21, 22}

Whereas, The practice of having employed persons of ENA WorkWell Solutions, LLC, DBA Engage, Powered by ENA, ENA, or other future subsidiaries serve as volunteer leaders of the membership organization deviates from observed general non-profit industry and nursing professional organization practices;^{2, 8, 9, 10, 11, 13, 14, 15, 16, 18, 20, 21, 22} and

Whereas, Nurse entrepreneurship and innovation is a growing field of nursing practice that may continue to create potential actual or perceived conflicts of interest for current and potential future volunteers of the organization.¹

Resolved, ENA explores industry best practices to ensure that our conflict of interest management and mitigation policies and practices are aligned with other national professional nursing associations and other non-profit organizations of equivalent size, caliber, and influence;

Resolved, ENA commits to practice and communication transparency of its' Conflict of Interest policy, procedure, and practice in the management and mitigation of conflict of interests so that members can be informed and guided when considering future volunteer positions, and to support their leadership development and future entrepreneurship choices.

Resolution Background Information

ENA is a Illinois not-for-profit corporation exempt from federal income tax pursuant to Section 501(c)(3) of the Internal Revenue Code of 1986, as amended, that relies on the engagement, service, and leadership of volunteers to maintain its status as the premier professional nursing organization in the world.¹⁷ ENA has committed itself to a mission of advancing excellence in emergency nursing and doing so in a way that supports diversity, equity, and inclusion.³

For our volunteers and volunteer leaders, it is essential to be able to make unbiased, independent decisions on behalf of the organization. This practice can be a challenge as individuals who volunteer to serve non-profits, especially on boards, often are engaged in a wide variety of professional, personal, and community relationships. This independent, unbiased decision-making can be further complicated when another organization or business relationship can be affected by or potentially benefit from decisions made in volunteer roles.^{8, 9, 10}

Resolution GA23-08

52 A conflict of interest can exist for a volunteer or board leader when an individual has a personal interest that is in
 53 conflict with the organization, such as having a personal interest that could influence their decision-making for
 54 the organization.^{14, 15, 16, 18, 20, 21} ENA describes a possible conflict of interest in their *ENA Volunteer Group*
 55 *Agreements: Conflict of Interest Policy* (n.d.) as “In general, any outside activity or direct or indirect financial
 56 interest which might, in any way, adversely influence or appear to influence an individual’s judgment in the
 57 performance of his duties to ENA or any of its subsidiaries or affiliates, involves a possible conflict of interest”.⁴
 58

59 There are two types of conflicts of interest addressed in this resolution: actual and perceived. Actual conflicts of
 60 interest for an individual occur when a person’s outside professional relationships or personal assets interfere
 61 with the person’s ability to render impartial official duties in the organization.^{14, 15, 16, 18, 20, 21} Perceived conflicts
 62 of interest for an individual are when a person’s outside professional relationships or personal assets cause the
 63 perception of interfering with the person’s ability to render impartial official duties in the organization.^{8, 9, 10, 20}
 64 Especially in today’s age of close public scrutiny, the perception of a conflict of interest can cause as much
 65 concern as an actual conflict of interest.^{1, 21} The more connected to ENA through business or employment
 66 opportunities a volunteer or volunteer leader (such as a board member) is, the more likely that intertwining
 67 circumstances could arise creating potential actual or perceived, and often problematic, conflicts.
 68

69 As described in Paul and Kurtz’s *Managing Conflicts of Interest: The Board’s Guide to Making Unbiased*
 70 *Decisions*, conflicts of interest management and mitigation policy and practices are not just important for an
 71 organization’s general conduct but also to encourage the “highest standards of behavior by the board and staff”.¹⁴
 72 ENA’s members and the greater emergency nursing community trust the organization to be best stewards of
 73 resources and to maintain rigorous standards of conduct and integrity.
 74

75 ENA’s current practice in managing and mitigating a volunteer or volunteer leader’s potential conflicts of
 76 interest is to do one or more of the following:
 77

- 78 • Follow the current *ENA Volunteer Group Agreements: Conflict of Interest Policy*⁴ and the *ENA Governance*
 79 *Policy*, Section 6.03 Conflict of Interest⁵
- 80 • Utilize the *ENA Conflict of Interest Disclosure Form*
- 81 • Members of the board of directors vote on potential conflict of interest issues as needed
- 82 • Follow a practice of “recusal” to mitigate potential influences on the decision-making process when
 83 discussing and voting on items that could present as a conflict of interest for participating volunteers and
 84 volunteer leaders.

85
 86 On March 7, 2023, Terry Foster, 2023 ENA President, shared that “in January, ENA WorkWell Solutions, LLC,
 87 now doing business as Engage, was created as a subsidiary of ENA, following board approval” (T. Foster,
 88 personal communications, March 7, 2023). On April 18, 2023, ENA emailed its’ general membership to
 89 announce the establishment of ENA WorkWell Solutions, LLC, doing business as (DBA) Engage, Powered by
 90 ENA (Emergency Nurses Association, personal communications, April 18, 2023). In March 2023, two of the
 91 national ENA 2023 Board of Directors changed their employment on LinkedIn to Vice President of Client
 92 Engagement at ENA WorkWell Solutions, LLC, DBA Engage, Powered by ENA.^{12, 19}
 93

94 Having individuals serving on the national Board of Directors who are also employed by ENA, or an ENA
 95 subsidiary, deviates from past organizational practice and from observed common practices at other national
 96 nursing professional organizations of ENA’s equivalent size, caliber, and influence.^{2, 9, 10, 11, 22} The practice also
 97 appears that it could have been executed through a potentially inequitable and noninclusive conflict of interest
 98 management and mitigation process, which goes against our commitment to diversity, equity, and inclusion.³
 99

100 As the environment of emergency nursing continues to evolve in the arenas of innovation and entrepreneurship
 101 and as ENA members are involved in a spectrum of personal, professional, and community activities around the

Resolution GA23-08

102 world, ENA will doubtless continue to have situations arise where volunteers or volunteer leaders may have
103 actual or perceived conflicts of interest that need to be evaluated, managed, and mitigated.¹

104
105 To maintain the most inclusive and equitable opportunities for our diverse membership, to continue to foster
106 strategic growth opportunities for the organization, and to support ENA's mission and vision, it is vital that ENA
107 researches and establishes best policy, procedure, and practice for managing and mitigating actual and perceived
108 conflicts of interest. The current ENA Conflict of Interest Policy Statement should be updated if this research
109 dictates and the policy should be strictly followed. This should be done in such a way that promotes diversity,
110 equity, and inclusivity of ENA's volunteer and leadership opportunities and ENA's overall work.

111 112 **Relationship to ENA Bylaws, Mission, Vision, and Strategic Initiatives**

113 Exploring best practices and operationalizing policy and procedures for managing and mitigating conflicts of
114 interest for volunteers to align with industry standards supports ENA's mission of advancing excellence in
115 emergency nursing and its vision to be the premier organization for the emergency nursing community
116 worldwide.

117 Further, through potential deviation from accepted best practices and ineffective and inequitable conflict of
118 interest management and mitigation policies and procedures, the potential exists for erosion of trust and
119 engagement by members and corrosion of ENA brand integrity in the public realm. This divergence from the
120 mission and vision of ENA could deter leadership development initiatives, future growth of the association, and
121 limit future potential strategic initiatives and business opportunities.

122 123 **Financial Considerations/Operations Impact**

124 The scope of work outlined in the resolved clauses has a fiscal impact less than \$10,000. Upon final outcomes of
125 General Assembly, initiatives will be evaluated for resource planning in alignment with ENA's strategic plan and
126 operational goals.

260

261 **Letter of Intent**

262 As engaged members of ENA who have served as volunteers and volunteer leaders at almost every level of the
263 organization, we are invested in ensuring that ENA maintains the highest level of performance and integrity. We
264 hope to support the organization in adopting policy, procedure, and practice that enables ENA to be clear and
265 transparent in its actions to members and compliant with laws and regulations. The hope is also that such
266 policies, procedures, and practices would also support the growth of the association and its future strategic
267 initiatives and operationalize processes that continue to foster diversity, equity, and inclusivity of ENA's
268 volunteer and leadership opportunities and work.

Resolution GA23-09

TITLE: Improving Emergency Department Team Member Safety by Identifying Environmental Design Precautions

Whereas, It is well documented that violence in the emergency department (ED) is underreported by both nurses and physicians. After the development of a reporting guideline, the number of incidents reported in a Malaysian hospital increased by 159% in one year (Lim et al., 2022);

Whereas, Workplace violence (WPV) is an underreported occupational hazard, and 50% of employees and 25% of physicians report physical assault (Nowrouzi-Kia et al., 2019). Underreporting has been attributed to the normalization of violence as part of the job (Raveel & Schoenmakers, 2019);

Whereas, ED settings are open to the public, having easy access points and 24-hour availability that enhances vulnerability of team members (Hou et al., 2022). Restricting access with a locking mechanism has been shown to improve team members' confidence in safety (Reissmann, et al., 2023);

Whereas, ED's often feature overcrowding, long wait times, and frustrated patients, accompanied by inadequate security systems in relation to the volume of patients (Hou et al., 2022);

Whereas, A zero-tolerance policy on ED violence has been advocated for by many organizations. The nursing profession will no longer tolerate violence of any kind from any source, and all organizational leaders should safeguard health professionals from the risks of violence (American Nurses Association, 2015; Association of American Medical Colleges & National Academy of Medicine, 2022; American Organization for Nursing Leadership [AONL] & Emergency Nurses Association [ENA], 2022; American College of Emergency Physicians, 2022);

Whereas, Violence reduction in the ED setting is complex and should include administrative, educational, environmental, and security interventions (Hou et al., 2022).

Whereas, the ED has a high risk for violence, the focus of many interventions has been on managing violent incidents rather than on preventing them to create a more secure work environment. (Xu et al., 2019, Alsharari et al., 2022, Spelten et al., 2020).

Resolved, Over the next 12 months, ENA will recruit subject matter experts in ED team member safe practice strategies to develop a clinical practice guideline with micro-level interventions for ED's to consider implementing.

Resolved, Over the next 12 months, ENA will recruit subject matter experts in ED team member safe practice strategies to develop a clinical practice guideline identifying the preferred macro interventions for ED's to implement to enhance staff safety.

Resolved, The WPV subject matter experts, recruited by the ENA will utilize the available literature to develop the top ten micro and macro prevention strategies that could be utilized by hospital and ED leaders and team members to promote a safe environment: and

Resolved, ENA will share the clinical practice guideline enhancing team member safety by highlighting it in *ENA Connection*, on the ENA website, in ENA University, and on social media sites.

Resolution Background Information

Background relevant to the resolution includes information on workplace violence in healthcare, risk factors for violence in the ED, and preventative approaches.

Resolution GA23-09

51 *Workplace Violence in Healthcare*

52 Healthcare workers are at high risk for injuries from WPV. Healthcare workers accounted for 75% of nonfatal
 53 injuries and illnesses due to violence in 2018 (United States Bureau of Labor Statistics, 2020). Verbal abuse
 54 (62.4%) is the form of violence occurring most frequently, followed by psychological (50.8%), threats (39.5%),
 55 physical (13.7%) and sexual harassment (6.3%). Cyberbullying has been on the rise and is resulting in
 56 humiliation, defamation, and unlawful video recording (Lim et al., 2022). Female healthcare workers with fewer
 57 years of experience are at higher risk of experiencing WPV (Kumari et al., 2020) than their more experienced or
 58 male colleagues. WPV is a global concern. Kumari et al. (2020) found that WPV against doctors is also high. In
 59 Thailand and Morocco, physicians report rates of violence of 54% and 70% respectively. The trend is rising in
 60 other Asian countries as well, with growth from 19.6% to 25%. Physicians report that verbal abuse is the most
 61 common (42.5%), followed by physical violence (24.4%), and that the ED has the highest incidence (68.4%).
 62

63 The Occupational Safety and Health Administration (OSHA) enforces workplace safety for most U.S. healthcare
 64 workers (Occupational Safety and Health Administration, United States Department of Labor, n.d.). The Joint
 65 Commission (2021) also includes standards regarding WPV. There are no specific federal standards concerning
 66 WPV in the U.S. (Surber, 2021). However, employers must ensure healthcare workers are free from recognized
 67 hazards.
 68

69 *Risk Factors for Violence in the ED*

70 One risk factor that may affect ED team members is encountering weapons in the work setting. Blando et al.
 71 (2021) reported that 20% of adolescents in an urban ED setting carried a knife or razor blade and 7% carried a
 72 firearm. Smalley et al. (2018) conducted a 15-month survey evaluating the number of weapons confiscated in
 73 eight hospital ED entry points in the U.S. Data revealed that in 346,323 visits with 1,179,530 screenings 10,691
 74 weapons were confiscated. Hospitals with trauma centers and behavioral health facilities had the highest
 75 confiscation rates. In 2018, the Cleveland Clinic seized over 30,000 weapons in one of its northeast Ohio ED's
 76 (Surber, 2021).
 77

78 *Preventative Approaches*

79 A variety of preventative approaches have been proposed. Several studies conducted over 20 years ago reported
 80 no change in the number of assaults reported in the ED setting over time, but the number of assaults involving
 81 weapons decreased. Further, studies conducted over 25 years ago found that patients, visitors, and staff supported
 82 the use of metal detectors in the ED (Blando, Paul, & Szklo-Coxe, 2021).
 83

84 Raveel and Schoenmakers (2019) conducted a systematic review of interventions to prevent aggression against
 85 physicians. Two intervention categories were identified. The first includes WPV prevention strategies. De-
 86 escalation training is generally advocated for, but due to it being highly specialized training, it may have limited
 87 effectiveness in preventing WPV. The second category includes changes to the physical environment. These
 88 interventions may include improved lighting, physical barriers, video cameras, limiting visitor access to two
 89 individuals, use of panic buttons, and use of metal detectors. A comprehensive multidimensional approach is
 90 recommended by Wirth et al. (2021) that should include signage, policies and procedures, video surveillance,
 91 screening for patients at risk for violence, security presence, visitor limitations, and duress alarms.
 92

93 In the literature when evaluating mitigation strategies for WPV, topics such as environmental conditions and
 94 minimizing access are touched on, but no firm strategies are identified. Micro level preventions strategies are
 95 patient focused and include recommendations for valid and reliable assessment tools for violent patient behavior,
 96 guidance regarding de-escalation and self-defense training for staff members including verbal and non-verbal
 97 techniques, collaboration with ancillary departments and encouraging patients with coping strategies (Richardson
 98 et al., 2019), Macro level prevention strategies are aimed at hospital initiatives and may include security
 99 surveillance, security dogs, security doors, security cameras, controlled access, metal detectors and protective
 100 glass, access to panic alarms, lock down procedures and enhanced lighting and visibility recommendations

Resolution GA23-09

(Lenaghan, Cirrincione, & Heinrich, 2018, Raveel & Schoenmakers, 2019, Reibmann, et al. 2023, Richardson et al., 2019, Somani, et al., 2021, Zamani, Z. 2019).

International or regional professional organizations play essential roles in supporting, and contributing initiatives and mechanisms aimed at minimizing and eliminating the potential risks that healthcare providers encounter in the workplace (Lim et al., 2022). Organizational culture must change to ensure violent acts are reported. Guidelines to protect the ED team, increased security in vulnerable areas, and improved staffing levels can all be key to decreasing WPV incidents (Nowrouzi-Kia et al., 2019).

Relationship to ENA Bylaws, Mission, Vision, and Strategic Initiatives

ENA's mission and vision go hand in hand with ensuring that all ED nurses have the right to a safe work environment. By providing guiding principles to ED leaders and nurses, ENA will ensure that nurses feel safe at work and will advocate for advancing excellence in nursing as the premiere emergency nursing organization. With the implementation of the "No Silence on ED violence" campaign, ENA aimed to support, empower, and provide resources to effect safety in the workplace. Interestingly, the most recent research article noted on the quality and safety workplace violence page on the ENA website is from 2014 (NA, nd). It is well documented that violence against healthcare workers is surging (AONL & ENA, 2022), it seems pertinent to evaluate this phenomenon in the ED setting in the current environment. The ENA offers a toolkit for mitigating workplace violence that highlights understanding, creating a culture of non-violence, assessing and mitigating risk factors, developing a prevention program, training staff, and evaluating the effect of the interventions. It does not offer specific criteria that should be implemented to ensure the safety of ED healthcare workers as cited in the preceding section. This resolution is in line with the practice environment strategic goal. This resolution will enhance the success of this goal by going further than merely assessing the environment but by making recommendations for safety.

Financial Considerations/Operations Impact

To be completed by ENA staff. The scope of work outlined in the resolved clauses has a fiscal impact between \$10,000-\$25,000. Upon final outcomes of General Assembly, initiatives will be evaluated for resource planning in alignment with ENA's strategic plan and operational goals.

Resolution GA23-09

253 **Letter of Intent**

254 As the premiere organization for ED nursing, ENA must take a stance on recommending strategies such as the
255 preferred micro and macro intervention for mitigating workplace violence against ED healthcare workers. ED
256 nurses should be able to reference the ENA website to identify specific strategies that could be used by
257 organizations to enhance safety.

Resolution GA23-10

TITLE: Licensure Requirements for Emergency Nurses Association Membership

Whereas, ENA Bylaws state “only licensed (or the equivalent thereto) professional registered nurses are eligible to be Voting Members” (ENA, 2023, p. 1);

Whereas, ENA Bylaws state that members can be disciplined for failure to comply with ENA Bylaws and such discipline can include suspension and expulsion (ENA, 2023);

Whereas, some jurisdictions require active practice hours to retain licensure, resulting in loss of license for disabled or retired nurses (e.g., Nebraska Department of Health and Human Services, n.d.; New Hampshire Office of Professional Licensure and Certification, n.d.; Oregon Secretary of State, n.d.; South Dakota Board of Nursing, n.d.; Vermont Office of Professional Regulation, n.d.);

Whereas, substance use disorder (SUD) is a chronic, treatable disease and is a common reason for nursing license restriction (American Psychiatric Association, 2020.; Chelle Law, 2022; National Institute on Drug Abuse, 2020);

Whereas, ENA members, including Lifetime Members, have been temporarily stripped of their membership rights and privileges because of self-reported license restrictions related to SUD;

Whereas, nursing licenses may be restricted for actions that pose no risk to patient or public safety (NurseJournal, 2022);

Whereas, license restriction, retirement, disability, or disease do not necessarily render a nurse incapable of safely participating in and bringing value to ENA; and

Whereas, amendments to the ENA Bylaws may be proposed by the Board of Directors (ENA, 2023).

Resolved, the ENA Board of Directors or their designee(s) be tasked with investigating changes to the ENA Bylaws that would allow nurses without current active, unencumbered licenses to continue to participate in ENA as voting members in some situations.

Resolved, the ENA Board of Directors submit a proposed amendment or amendments to the ENA Bylaws regarding licensure requirements for voting membership if warranted by the findings of the investigation, for discussion and vote by the General Assembly at the next possible opportunity.

Resolution Background Information

In Article III, Members, the ENA Bylaws state the following:

Section 2. Classifications and Criteria. Membership may be granted to any individual who (i) abides by these bylaws, the ENA Code of Ethics, and such other policies, rules and regulations as ENA may adopt; and (ii) meets the criteria for membership set forth in one of the following categories:

A. Voting Members – voting members shall be classified as national, international, senior, and military (“Voting Members”). Only licensed (or the equivalent thereto) professional registered nurses are eligible to be Voting Members. Voting Members shall have the right to vote, hold elected office, serve on the Board of Directors, serve on committees, and attend ENA’s meetings and social functions.

Section 4. Disciplinary Action

A. **Grounds for Discipline.** ENA may discipline a member for any of the following reasons:

- i. Failure to comply with these Bylaws, the ENA Code of Ethics, or any of ENA’s rules or regulations;
- ii. Conviction of a felony or a crime related to, or arising out of, the practice of nursing or involving moral turpitude;
- iii. Suspension, revocation, or forfeiture by any state, province, or country of the member’s right to

Resolution GA23-10

- 52 practice as a nurse; or
 53 iv. Immoral, dishonorable, or unprofessional conduct considered prejudicial to the best interests of, or
 54 inconsistent with, the purposes of ENA.
 55 B. **Procedures.** Discipline may include, but not be limited to, censure, suspension, probation, and
 56 expulsion.

57 Maintaining a nursing license is subject to requirements determined by countries, states, and territories. License
 58 renewal requirements vary widely, from simply paying a fee, at one end of the spectrum, to requirements for
 59 hundreds of hours of active practice, continuing education, criminal background checks, and fingerprinting at the
 60 other end of the spectrum. Requirements for active practice, the expense and inconvenience of obtaining criminal
 61 background checks and fingerprinting, or high license renewal fees may result in nurses voluntarily surrendering
 62 their license upon retirement or becoming disabled. Many states do not have a non-disciplinary mechanism to
 63 retire or relinquish a license, and surrender of a license has the same legal effect as revocation. Surrendering an
 64 RN license does not mean that these nurses surrender their knowledge about emergency nursing. Retired or
 65 disabled nurses with decades of experience can be valuable contributors as General Assembly delegates and in
 66 other ENA activities and forums.

67 Substance use disorder (SUD) is a chronic yet treatable disease (Centers for Disease Control and Prevention,
 68 2022; National Institute on Drug Abuse, 2020) for which healthcare professionals should not be stigmatized.
 69 Drug diversion for personal use is a symptom of SUD, not exclusively a crime (ENA, 2022). A substantial
 70 number of alleged professional conduct violations among nurses, 42.3% in one report, are related to substance
 71 use (CNA Healthcare Underwriting & Nurses Service Organization, 2020). The substances used include not only
 72 illicit narcotics but also legal substances such as alcohol and, in some jurisdictions, cannabis. Nurses with SUD
 73 often have their licenses restricted while completing monitored rehabilitation and recovery programs. These
 74 alternative-to-discipline (ATD) programs help nurses with SUD continue or return to practice in a way which
 75 safeguards the public (National Organization of Alternative Programs, n.d.). A nurse in recovery for SUD would
 76 be able to participate in ENA activities as a voting member without compromising public safety.

77 Nurses are frequently disciplined for actions that present no patient or public safety concerns (NurseJournal,
 78 2022). For example, a grateful patient sends the nurse who saved his life a gift certificate for an expensive
 79 restaurant. If the nurse accepts the gift certificate it is a boundary violation, which could result in disciplinary
 80 action. A nurse starts an IV for hydration of a colleague who is sick at home with norovirus. This is a scope of
 81 practice violation and subject to disciplinary action. A nurse whose licensure discipline is for reasons that could
 82 not harm patients or the public would be able to continue as an ENA member with no risk to public safety.

83 Nurses who are disciplined by their licensing boards are already traumatized and demoralized by that experience
 84 (Brous, 2019). Their identity as a nurse is threatened, which is extremely disabling and may lead to suicide
 85 (Pilla, 2021). In addition to setting and maintaining standards, professional organizations have the obligation to
 86 advocate for their members. Expulsion or discipline from those organizations with which nurses identify
 87 intensifies their depression and hopelessness at a time when they most need support. Licensure discipline already
 88 causes inactivation of specialty certification like CEN. Further punitive action serves no purpose and can be
 89 damaging to our vulnerable colleagues, undermining their ability to return to practice.

90 **Relationship to ENA Bylaws, Mission, Vision, and Strategic Initiatives**

91 Relevant sections of the ENA Bylaws follow:

92 **ARTICLE XIV** 93 **AMENDMENT**

94 **Section 1. Proposals**

95 Amendments to the bylaws may be proposed by the Board of Directors, state councils or under the signature
 96 of ten Voting Members in good standing. Amendments proposed by a State Council or under the signature of
 97 ten Voting Members in good standing are subject to the prior review and approval the Board of Directors to
 98 assure that proposed amendments (i) are consistent with ENA's purposes, mission, values and objectives; (ii)
 99 have no adverse financial impact on ENA; (ii) do not create inconsistencies or conflicts with other provisions
 100 of the bylaws; and (iv) do not conflict with the requirements of ENA's Articles of Incorporation or federal or
 101 state law. Proposed amendments approved or introduced by the Board of Directors (collectively, "Approved

Resolution GA23-10

Proposals”) will be presented to the General Assembly in accordance with the provisions set forth below in this article XIV.

ARTICLE XIV AMENDMENT

Section 4. Vote

In order to be adopted, Approved Proposals must be approved by a two-thirds vote of the delegates present and voting at a meeting of the General Assembly.

Financial Considerations/Operations Impact

The scope of work outlined in the resolved clauses has a fiscal impact between \$10,000-\$25,000. Upon final outcomes of General Assembly, initiatives will be evaluated for resource planning in alignment with ENA’s strategic plan and operational goals.

220

221 **Letter of Intent**

222 This resolution directs the ENA Board of Directors to submit a proposed amendment(s) to the ENA Bylaws for
223 discussion and vote by the General Assembly at the next possible opportunity. Prior to drafting proposed
224 amendments to the bylaws, it is important to hear discussion by ENA members in response to this resolution as
225 well as to investigate the legal implications and the practices of other nursing organizations. These tasks are most
226 appropriately undertaken by ENA Board of Directors members and staff. Redefining licensure requirements for
227 ENA membership can help retain the expertise of nurses who, for various reasons, no longer have an active,
228 unencumbered nursing license. These nurses could serve as delegates to the General Assembly and retain other
229 rights associated with membership. The bylaws will continue to identify grounds for disciplinary action when
230 members are convicted of a crime or engage in unprofessional conduct deemed to be prejudicial or inconsistent
231 with the best interests of ENA.

Resolution GA23-11

TITLE: Support for the Use of the Title “Doctor” by Doctorate-Prepared Registered Nurses

Whereas, The title of *doctor* is derived from the Latin verb *docere* meaning *to teach*, and has origins back to the 1300s as a title given to scholars (Asfour & Winter, 2018);

Whereas, A doctorate is the highest academic degree conferred by a university, representing the ultimate in accomplishment and proficiency (Britannica, 2023). The title of *doctor* is an acknowledgment of the tremendous hard work and perseverance exhibited by those who fulfill the rigorous education requirements of a doctoral program, whether that be the Doctor of Nursing Practice (D.N.P.), Doctor of Philosophy (Ph.D.), Doctor of Education (Ed.D.), Doctor of Medicine, (M.D.), or other doctoral programs;

Whereas, The title of *doctor* is commonly used in academia by nurses and non-nurses who have earned a doctoral degree and is identified as proper etiquette both socially and professionally (The Emily Post Institutes, n.d.);

Whereas, Between 2011 and 2021, the number of adults with doctoral degrees has more than doubled in the United States to 4.7 million people, over 75% of which are held by non-physicians (U.S. Census Bureau, 2022);

Whereas, Doctorate-prepared nurses are educated to conduct nursing research, translate research findings into clinical practice, and are adequately poised to influence and improve patient outcomes (Sanders et al., 2020). As of 2020, 2.4% of registered nurses in the United States hold a doctoral degree, which emphasizes leadership in clinical settings (Rodriguez, 2016; Sanders et al., 2020; Smiley et al., 2021); and

Whereas, Professional organizations representing various nonphysician disciplines have been vocal in advocating for the appropriate and safe use of the title *doctor* within their professions or opposing legislation restricting such use (American Academy of Otolaryngology–Head and Neck Surgery; American Association of Nurse Practitioners, 2022; American Optometric Association, 2023; Anderson 2008);

Resolved, That ENA formally support the use of the title *doctor* in the clinical and non-clinical setting for nurses who have completed doctoral education (e.g., Ph.D., D.N.P., Ed.D.) with the acknowledgment that nurses are not attempting to replace or supersede physicians;

Resolved, That ENA work with stakeholders (e.g., American Nurses Association, American Association of Colleges of Nursing, American Association of Nurse Practitioners, and other specialty nursing organizations) to provide education and clarity to the public around the use of the title of *doctor* by nurses who have achieved the doctoral level; and

Resolved, That ENA collaborate with other stakeholders to advocate against legislation limiting the use of earned doctorates.

Resolution Background Information

The title, *doctor*, was first given to theologians in the 1300’s (Asfour et al., 2018). Approximately 300 years later, in the 17th century, medical schools began to refer to their graduates as *doctors* (Asfour et al., 2018). Even then, surgeons and apothecaries were not awarded the title of *doctor*, only physicians—due to their overall training requirements (National Library of Medicine, 2021). In fact, medical practice was not regulated until 1847, with the development of the American Medical Association and the first recommended educational standards for physicians, which only required three years of study (National Library of Medicine, 2021). In 1893, Johns Hopkins University opened the first academic medical school, of which the future of medicine was modeled after (National Library of Medicine, 2021). However, it wasn’t until 1930 that most medical schools

Resolution GA23-11

51 required a liberal arts degree prior to admission for matriculation in medicine (National Library of Medicine,
52 2021).

53
54 In 2004 the American Association of Colleges of Nursing (AACN) voted to endorse the practice doctorate
55 degree in nursing, known as the DNP (American Association of Colleges of Nursing, 2022). This degree was
56 meant to help nurses achieve a terminal degree that was not in research per se but which would enable them to
57 translate and implement research in the practice setting. Patient care becoming increasingly complex, physician
58 shortages, nurse and nurse faculty shortages, and concerns about patient care all helped to establish the need for
59 the Nursing Practice Doctorate. The Council on Accreditation of Nurse Anesthesia Educational Programs has
60 declared that all accredited Certified Registered Nurse Anesthetist (CRNA) programs must be doctoral programs
61 by 2025. In 2023 the National Organization of Nurse Practitioner Faculties (NONPF) reaffirmed their
62 commitment that all entry nurse practitioner programs be DNP-focused by 2025. NONPF and AACN have found
63 that the number of DNP programs has doubled, while the number of graduates has more than doubled (American
64 College of Nursing, 2022; National Organization of Nurse Practitioner Faculties, 2023). NONPF also found that
65 this change has led to more nurses of a minority background graduating and that DNP-prepared Nurse
66 Practitioners had higher pass rates and more clinical practice than those with a master's degree (National
67 Organization of Nurse Practitioner Faculties, 2023).

68
69 While the official policy of the American Medical Association (2012) and the American College of Emergency
70 Physicians (2020) holds that these organizations “strongly oppose” the use of the title *doctor* by nonphysicians,
71 both organizations clarify that nonphysicians electing to use the title of *doctor* in the clinical practice must
72 specifically and simultaneously also define the nature of their doctoral degree to clarify they are not physicians.
73 The American Academy of Emergency Medicine (2020), however, takes the more restrictive stance that
74 nonphysicians “must not be called ‘doctor’ in the clinical setting” (American Academy of Emergency Medicine,
75 2020).

76
77 More recently, legislative efforts have been undertaken—often successfully—to prohibit the use of the title
78 *doctor* by nonphysicians. Additionally, news outlets such as *The New York Times* have limited the use of the title
79 *doctor* to those who are physicians, dentists, and veterinarians while limiting its use when referring to those with
80 other earned doctorates (Corbett, 2015). Currently, in California, AB 765 (2023) makes it a misdemeanor for
81 anyone who is not an MD or a DO to use the title *doctor*, including the prefix “Dr”. Furthermore, a DNP nurse
82 was fined nearly \$20,000 for use of the *doctor*, despite indicating her nurse practitioner status whenever possible
83 (Hollowell, 2023). Additional states that include legislative measures currently, or already in statute, include, but
84 are not limited to, Florida, Wisconsin, Texas, Kentucky, with a penalty of losing your license for 6-12 months
85 (Conditions governing use of title "Doctor" or "Dr." –Penalty, 2010; Healing Art Identification Act, 1999;
86 Hollowell, 2023; Wisconsin S.B. 143, 2023). This is, by far, *not* an exhaustive list.

87 88 **Relationship to ENA Bylaws, Mission, Vision, and Strategic Initiatives:**

89 ENA’s mission is to advance excellence in emergency nursing, and encouraging nurses to achieve the highest
90 level of nursing education (the doctorate) exemplifies this mission.

91 A doctorate is a terminal professional degree emphasizing advanced clinical knowledge and expertise. Doctoral
92 degrees prepare nurses to assume various roles in healthcare, policy, administration, and clinical practice. The
93 knowledge and skills gained through a doctoral program can significantly contribute to achieving the Emergency
94 Nurses Association’s mission of safe practice and safe care.

- 95 • **Advanced Clinical Competence:** Doctoral programs enhances nurses’ clinical expertise, equipping them
96 with advanced knowledge and skills in patient assessment, diagnosis, and management. This level of clinical
97 competency enables doctorate-prepared nurses to provide safe and effective care to patients in emergency
98 settings.
- 99 • **Leadership and Advocacy:** The doctoral curriculum focuses on leadership development, healthcare policy,
100 and advocacy. Doctorate-prepared nurses are trained to critically analyze healthcare systems and policies,
101 identify areas for improvement, and advocate for changes that promote safe practice and care. By leveraging

Resolution GA23-11

their leadership skills, doctoral graduates can influence emergency nursing practice to prioritize patient safety.

- **Evidence-Based Practice:** The doctoral curriculum emphasizes evidence-based practice, where nurses are trained to critically appraise research literature and integrate it into clinical decision-making. By staying abreast of the latest research and best practices, doctorate-prepared nurses can enhance patient safety by implementing evidence-based interventions and protocols in emergency care.
- **Quality Improvement and Patient Safety:** Doctorate programs often include coursework on quality improvement and patient safety, teaching nurses how to assess and improve healthcare delivery processes. Doctorate-prepared nurses can identify potential hazards or inefficiencies in emergency care settings, develop strategies for improving safety protocols, and collaborate with interdisciplinary teams to implement these changes, ultimately ensuring safer practices and better patient outcomes.
- **Education and Mentorship:** As doctorate graduates advance, they often assume roles as educators and mentors for nursing students and less experienced nurses. By sharing their knowledge and expertise, Doctorate-prepared nurses can foster a culture of safe practice and care among the next generation of emergency nurses, emphasizing the importance of patient safety and providing guidance on best practices.

Financial Considerations/Operations Impact

To be completed by ENA staff. The scope of work outlined in the resolved clauses has a fiscal impact between \$10,000-\$25,000. Upon final outcomes of General Assembly, initiatives will be evaluated for resource planning in alignment with ENA’s strategic plan and operational goals.

228 **Letter of Intent**

229 The intent of this resolution is to bring ENA into a proactive stance to advocate for doctorate-prepared nurses.
230 While we fully honor and respect that physicians and nurses, regardless of educational level, have different
231 training, nurses continue to hold varying levels of education. It is in the differences of our educations that we can
232 collaborate and come together for the best of our patients. However, until we challenge the narrative, nursing
233 education will continue to be minimized in the eyes of the public, as well as in the eyes of the profession. We
234 would like ENA to be at the forefront of this advocacy, for the emergency nurses who currently hold doctorates,
235 and for those who may hold doctorates in the future.

Resolution GA23-12

1 **TITLE: Support the Use of Nasal Naloxone on U.S. Airlines and in Public Schools and Universities**

2
3 Whereas, There is currently a national epidemic of opioid ingestions, with the majority from opioids
4 (Hedegaard et al., 2021; National Institute on Drug Abuse, 2023);

5
6 Whereas, The recognized emergent treatment outside of health facilities is nasal naloxone (National
7 Institute of Health. 2022);

8
9 Whereas, Administration of nasal naloxone does not require specific education (Centers for Disease
10 Control and Prevention, 2019);

11
12 Whereas, Nasal naloxone can be supplied in emergency medical kits (i.e., automated external
13 defibrillator [AED] cases, Stop the Bleed kits (STBs), or other emergency medical kits for public access; and

14
15 Whereas: Administration of nasal naloxone has been demonstrated to save lives (Darke et al, 2003;
16 National Institute of Health [NIH], 2022).

17
18 *Resolved*, The Emergency Nurses Association (ENA) supports use of nasal naloxone on U.S. airlines, in
19 public schools and universities, and in public facilities that have AEDs and STBs; and

20
21 *Resolved*, ENA collaborates with other stakeholders in expanding access to naloxone and support for
22 harm reduction programs with the goal of informing the public about the use of naloxone to prevent overdose
23 deaths.

24
25 **Resolution Background Information**

26 More than 932,000 people have died since 1999 from a drug overdose (National Institute on Drug Abuse,
27 2023). Nearly 75% of drug overdose deaths in 2020 involved an opioid (Hedegaard, 2021).

28
29 Overdose deaths involving opioids, including prescription opioids, heroin, and synthetic opioids (like fentanyl),
30 have increased by more than eight times since 1999 (Centers for Disease Control and Prevention [CDC], n.d.).

31
32 More than 80% of overdose deaths involved opioids, and most of these deaths specifically involved IMFs
33 (illicitly manufactured fentanyl). IMFs put people at an increased risk for overdose death:

34
35 Illicitly manufactured fentanyl, heroin, cocaine, or methamphetamine (alone or in combination) were involved in
36 nearly 85% of drug overdose deaths in 24 states and the District of Columbia during January–June 2019. More
37 than three out of five overdose deaths involved at least one potential opportunity to link people to care before an
38 overdose or to implement life-saving actions when an overdose occurs. These opportunities can be targeted to
39 both prevent overdoses and improve response to overdoses to prevent deaths.

40
41 More than three in five people who died from drug overdose had an identified opportunity for linkage to care or
42 life-saving actions.

43
44 Naloxone is a life-saving medication that can reverse an overdose from opioids, including heroin, fentanyl, and
45 prescription opioid medications. Often given as a nasal spray, naloxone is safe and easy to use. Naloxone quickly
46 reverses an overdose by blocking the effects of opioids. It can restore normal breathing within two to three
47 minutes in a person whose breath has slowed, or even stopped, as a result of opioid overdose. More than one
48 dose of naloxone may be required when stronger opioids like fentanyl are involved.

Resolution GA23-12

50 Nearly 75% of drug overdose deaths in 2020 involved an opioid (Hedegaard et al., 2021).

51
52 Overdose deaths involving opioids, including prescription opioids, heroin, and synthetic opioids (such
53 as fentanyl), have increased by more than eight times since 1999 (Hedegaard et al., 2021). Overdoses involving
54 opioids killed nearly 69,000 people in 2020, and over 82% of those deaths involved synthetic opioids
55 (Hedegaard et al., 2021; National Institute on Drug Abuse, 2023).

56
57 According to the Centers for Disease Control and Prevention, nearly 50,000 people died from an opioid-involved
58 overdose in 2019 (n.d.). One study found that bystanders were present in more than one in three overdoses
59 involving opioids (CDC, n.d.). With the right tools, bystanders can act to prevent overdose deaths. Anyone can
60 carry naloxone, give it to someone experiencing an overdose, and potentially save a life (CDC, n.d.).

61
62 Good Samaritan laws are in place in most states to protect those who are overdosing and anyone assisting them
63 in an emergency from arrest, charges, or a combination of these.

64
65 The most recent provisional data available from the CDC's National Center for Health Statistics indicate that
66 approximately 8180,411 drug overdose deaths occurred in the United States in 2021. This represents a worsening
67 of the drug overdose epidemic in the United States and is the largest number of drug overdoses for a 12-month
68 period ever recorded (National Institute on Drug Abuse, 2023).¹ After declining 4.1% from 2017 to 2018,² the
69 number of overdose deaths increased 18.2% from the 12-months ending in June 2019 to the 12-months ending in
70 May 2020 (CDC, n.d.). Drug overdose deaths during this time increased more than 20% in 25 states and the
71 District of Columbia, 10% to 19% in 11 states and New York City, and 0% to 9% in 10 states. Drug overdose
72 deaths decreased in four states (CDC, n.d.).

73
74 The recent increase in drug overdose mortality began in 2019 and continued into 2020, prior to the declaration of
75 the COVID-19 National Emergency in the United States in March. The increases in drug overdose deaths appear
76 to have accelerated during the COVID-19 pandemic. Provisional overdose death estimates indicate that the
77 largest monthly increases in drug overdose deaths occurred in the 12-months ending in February 2020 (74,185
78 deaths) and the 12-months ending in March 2020 (75,696 deaths), the 12-months ending in March 2020 (75,696
79 deaths) to the 12-months ending in April 2020 (77,842 deaths), and from the 12-months ending in April 2020
80 (77,842 deaths) to the 12-months ending in May 2020 (81,230 deaths). These one-month increases of 2,146
81 deaths and 3,388 deaths, respectively for the 12-month periods, are the largest monthly increases documented
82 since provisional 12-month estimates began to be calculated in January 2015 (CDC, 2020).

83
84 Synthetic opioids are the primary driver of the increases in overdose deaths. The 12-month count of synthetic
85 opioid deaths increased 38.4% from the 12-months ending in June 2019 compared with the 12-months ending in
86 May 2020. Of the 38 jurisdictions with available synthetic opioid data, 37 jurisdictions reported increases in
87 synthetic opioid overdose deaths for this time period (CDC, n.d.). Eighteen of these jurisdictions reported
88 increases greater than 50%, 11 reported increases of 25% to 49%, 7 reported increases of 10% to 24%, 1 reported
89 an increase of less than 10%. State and local health department reports indicate that the increase in synthetic
90 opioid-involved overdoses is primarily linked to illicitly manufactured fentanyl (Darke et al., 2023; NIH, 2022;
91 Osterwalder, 1996). Historically, deaths involving illicitly manufactured fentanyl have been concentrated in the
92 28 states east of the Mississippi River, where the heroin market has primarily been dominated by white powder
93 heroin (CDC, 2019; Darke et al., 2023). In contrast, the largest increases in synthetic opioid deaths from the 12-
94 months ending in June 2019 to the 12-months ending in May 2020 occurred in 10 western states (98.0%
95 increase). This is consistent with large increases in illicitly manufactured fentanyl availability in western
96 states (Davis, 2018) and increases in fentanyl positivity in clinical toxicology drugs tests in the West after the
97 COVID-19 pandemic (CDC, 2020). Increases in synthetic opioid overdose deaths were also substantial in other

Resolution GA23-12

98 regions: 12 southern states and the District of Columbia (35.4%), 6 midwestern states (32.1%), and 8
99 northeastern states and New York City (21.1%).

100
101 Naloxone is a lifesaving emergency treatment that reverses opioid overdose. It is a medicine with no abuse
102 potential, and it is not a controlled substance. It can also be administered by individuals with or without medical
103 training to help reduce opioid overdose deaths (FDA, 2023),

104
105 The FDA understands the importance of having all forms of naloxone available for community use. FDA
106 continues to take key steps in making this emergency treatment more readily available and more accessible
107 (FDA, 2023).

108
109 The FDA approved Narcan, a 4 milligram (mg) naloxone hydrochloride nasal spray for over-the-counter (OTC),
110 nonprescription, use – the first naloxone product approved for use without a prescription. Naloxone is a
111 medication that rapidly reverses the effects of opioid overdose and is the standard treatment for opioid overdose
112 (FDA, 2023).

113
114 Naloxone is a medicine that rapidly reverses an opioid overdose. It is an opioid antagonist (NIH, 2022).
115 Prepackaged nasal spray (generic naloxone, Narcan, Kloxxado), developed as a result of NIDA-funded research,
116 is an FDA-approved prefilled, needle-free device that requires no assembly and is sprayed into one nostril while
117 the person lays on their back. This device can also be easier for loved ones and bystanders without formal
118 training to use (NIH, 2022).

119
120 The risk that someone overdosing on opioids will have a serious adverse reaction to naloxone is far less than
121 their risk of dying from overdose (Darke et al., 2003; Osterwalder, 1996).

122
123 Naloxone works if a person has opioids in their system and has no harmful effect if opioids are absent. Naloxone
124 should be given to any person who shows signs of an opioid overdose or when an overdose is suspected (CDC,
125 2019).

126
127 As of December 2018, forty-six states and the District of Columbia provided legal immunity for friends, family,
128 and other bystanders, or “Good Samaritans,” seeking medical aid for someone experiencing an opioid overdose
129 (Davis, 2018).

130 131 **Relationship to ENA Bylaws, Mission, Vision, and Strategic Initiatives:**

132 A statement will demonstrate that ENA advocates for excellence in emergency practice and best outcomes for
133 patients and the support of the general public. Furthermore, ENA advocates for the best evidence-based
134 practices.

135 136 **Financial Considerations/Operations Impact:**

137 The scope of work outlined in the resolved clauses has a fiscal impact between \$10,000-\$25,000. Upon final
138 outcomes of the General Assembly, initiatives will be evaluated for resource planning in alignment with ENA's
139 strategic plan and operational goals.

180 Letter of Intent

181 Opioid overdoses are increasing annually to the point of national crisis. Most overdose incidents occur in settings
 182 where prevention and reversal of the effects of overdose can be intervened. Naloxone to the public has been
 183 made available by the FDA. The administration of naloxone does not require specialized knowledge or
 184 education. Naloxone can be readily available in public settings just as AEDs and STB (Stop the Bleed kits). By
 185 having naloxone available to the public, many deaths can be prevented. Preventable deaths should be at the
 186 forefront of everyone.

Resolution GA23-13

TITLE: Support Epinephrine Auto Injection, Nasal Spray, Sublingual Route on Domestic Airlines

Whereas: Anaphylactic reactions require emergent treatment when identified (Alvarez-Perea et al., 2017);

Whereas, Anaphylactic reactions are not uncommon on airlines, allergic reactions have a prevalence of 1.6% of in-flight emergencies (Hu & Smith 2021; Peterson et al., 2013) (Table 1);

Whereas, The accepted emergent treatment for anaphylactic reactions initially is epinephrine injection commonly with the use of an auto injection device (Alvarez-Perea et al., 2017; Sampson et al., 2006; Simons et al., 2014);

Whereas: There is no substitute for emergent treatment other than epinephrine (Alvarez-Perea et al., 2017; Sampson et al., 2006; Simons et al., 2014); and

Whereas: Airlines have emergency treatment kits, but not all contain auto injection delivery (Allergy & Asthma Network, 2023; Hu & Smith, 2021);

Resolved, The Emergency Nurses Association (ENA) support use of epinephrine via auto injection route for inflight anaphylactic reactions that could occur, and

Resolved, ENA collaborate with other stakeholders to develop education and training for the use of epinephrine in various routes of administration in emergent situations.

Resolution Background Information

Anaphylaxis is defined as a severe life-threatening generalized or systemic hypersensitivity reaction characterized by rapidly developing airway and/or circulation problems. Intramuscular epinephrine (adrenaline) is the medication of choice for the emergency treatment of anaphylaxis (Alvarez-Perea et al., 2017).

Since anaphylaxis is characterized by rapidly developing life-threatening airway and/or circulation problems, it must be managed quickly (Sampson et al., 2006; Simons et al., 2014).

Approximately 2.9 million passengers flew in and out of U.S. airports per day in 2022 (Food and Drug Administration [FDA], 2023).

There is no internationally agreed-upon recording and classification system for in-flight medical emergencies, and prevalence estimates vary between 24 and 130 emergencies per 1 million passengers (Dowdall, 2000). (8) Access to epinephrine is critical, yet innovation has been lacking. The first epinephrine auto-injector came on the market in 1987. Vial and syringe or auto-injectors are still the only option for treating anaphylaxis.

Data further shows that death from anaphylaxis occurs more often when there is either a delay in administering epinephrine or it is not given at all. Studies have shown that auto-injectors are often not carried or not used promptly. The causes of the delay vary, from needle phobia to hesitation using the auto-injector to reluctance to carry due to the size of the auto-injector devices.

The continued advancements in scientific research and development of treatments for anaphylaxis, which include needle-free nasal sprays and sublingual (under the tongue) administrations, give people additional treatment options. These are smaller-size alternatives for those who are reluctant to use or carry an auto-injector (Allergy & Asthma Network, 2023).

Resolution GA23-13

49 New epinephrine delivery routes (nasal spray and sublingual) are under review by the U.S. Food and Drug
50 Administration (Allergy & Asthma Network, 2023). In a public meeting on May 11, 2023, the FDA's
51 Pulmonary-Allergy Drugs Advisory Committee voted 16-6 in favor of the epinephrine nasal spray for use in
52 adults (Allergy & Asthma Network, 2023).

53
54 The U.S. Food and Drug Administration has granted fast track designation to AQST-109, the first and only
55 orally delivered epinephrine-based product candidate for the emergency treatment of allergic reactions, including
56 anaphylaxis. Fast track designation is an indication that the FDA recognizes that AQST-109, if approved, fulfills
57 a significant unmet need. An epinephrine oral film like AQST-109 would provide patients with a rescue
58 medication where they need it, when they need it, and in a form they prefer (SnackSafely, 2022).

59
60 Following are some relevant quotes from allergy professionals.

61
62 **Charmayne Anderson, Director of Advocacy May 11, 2023, at FDA Hearing Docket**
63 **Number FDA-2023-N-0984.** Allergy & Asthma Network, the leading national nonprofit
64 dedicated to improving the health of people with allergies, asthma, and related conditions, is
65 pleased to provide comments on the new epinephrine nasal spray under review by the U.S. Food
66 and Drug Administration (FDA). We are encouraged by this new treatment option, as
67 epinephrine is the primary therapy for treating anaphylaxis, a life-threatening allergic reaction.
68 Approximately 32 million Americans, including 6 million children, live with food allergies. Up
69 to 50 million people in the United States have experienced anaphylaxis to food, insect venom,
70 medication, and latex.

71 Anaphylaxis is estimated to cause 500 to 1,000 deaths annually. Epinephrine is the first-line
72 treatment when a person is experiencing a life-threatening allergic reaction.

73 **Ned S. Levi, 1 May 2023, Travel Advice.** The FAA's lack of a requirement for EpiPens on
74 planes' emergency medical kits puts passengers' lives at serious risk. Since 2003, the Federal
75 Aviation Administration (FAA) has required that all scheduled U.S. airlines carry epinephrine on
76 every aircraft in its required EMK. Unfortunately, most airlines only stock vials of the life-
77 saving drug, not the safe, easy-to-use auto-injectors of epinephrine. (10)

78 While airline crew members have first aid and aviation medicine training, they cannot inject
79 epinephrine into passengers suffering from anaphylaxis.

80 The vials of epinephrine are useless unless a doctor is aboard the flight to administer the drug.
81 Air travelers' lives are at stake, and vials of epinephrine are not a viable substitute for
82 epinephrine auto-injectors.

83 **Purvi Parikh, MD, FAAAAI. May 18, 2023. Allergy and Asthma Network** Epinephrine
84 auto-injectors were first approved by the U.S. Food and Drug Administration (FDA) in 1987.
85 Since then, the devices have become the standard of care for severe allergic reactions, or
86 anaphylaxis.

87 Now new [epinephrine](#) delivery routes are under review by the FDA: a nasal spray and
88 sublingual patch. Each will offer a new treatment option for people who prefer a needle-free way
89 to treat anaphylaxis.

91 Relationship to ENA Bylaws, Mission, Vision, and Strategic Initiatives

92 This position will demonstrate that ENA advocates for excellence in emergency practice and best outcomes for
93 patients and the supporting the public. Furthermore, ENA advocates for the best evidence-based practices. Rapid
94 delivery of treatment is essential to best practice outcomes during emergent situations.

Table 1 Federal Aviation Administration-Mandated Emergency Medical Kit Equipment and Medications

Equipment

Adhesive tape

Medications

Antihistamine tablets, 25 mg

Resolution GA23-13

Alcohol sponges	Antihistamine injectable, 50 mg
Cardiopulmonary resuscitation masks*	Aspirin tablets, 325 mg
Intravenous line start kit with tubing and Y-connectors	Atropine, 0.5 mg
Needles (18-, 20-, and 22-gauge)	Bronchodilator, inhaled
Oropharyngeal airways*	Dextrose, 50% per 50 ml, injectable
Protective nonpermeable gloves	Epinephrine 1:1000, 1 ml, injectable
Self-inflating manual resuscitation device with masks*	Epinephrine 1:10,000, 2 ml, injectable
Sphygmomanometer	Lidocaine, 5 ml, 20mg per ml, injectable
Stethoscope	Nitroglycerin tablets, 0.4 mg
Syringes (5 ml, 10 ml)	Nonnarcotic analgesic tablets, 325 mg
Tape scissors	Saline solution, 500 ml
Tourniquet	

Note: All airplanes with at least one flight attendant and a capacity for 30 or more passengers are required to have an automated external defibrillator.

146 Letter of Intent

147 Some of the major U.S. airlines carry epinephrine in their EMKs (emergency medical kits), typically in vials and

148 syringes for administration. However, flight attendants may not be trained in administration, which requires that

149 a physician or another medically trained person must be identified and verified prior to use. For various reasons,

150 up to 85% of the population prefer a needless route of administration before they would administer a medication.

151 Therefore, ENA should advocate for the alternative routes of administration under review.

ENA General Assembly Reference Guide

DELEGATION

1. Each state council shall determine its own method for delegate selection by using a point system, election or lottery.
2. Each state council is encouraged to take the following eligibility criteria into consideration in choosing its delegates:
 - Attendance at 50 percent of all scheduled meetings of the state council or local component since the previous General Assembly.
 - Service in an elected or appointed position at the local, state or national level during the prior three years; or
 - Participation in at least one of the following activities related to emergency nursing since the previous General Assembly:
 - Lecturer (other than that which is required in a professional nursing role)
 - Projects, such as public education, legislative involvement and chapter fundraising
 - Research in emergency nursing
 - Publishing on topics related to emergency care
 - Certification through the Board of Certification for Emergency Nursing (BCEN)
3. At least 30 days prior to the General Assembly, the ENA national office will send confirmation of delegate status to each delegate and alternate delegate. All proposed bylaws amendments, resolutions, rules and procedures will be made available on the ENA website.
4. Delegates and alternate delegates shall attend all business sessions of the General Assembly.

RESOLUTIONS

5. Resolutions must be submitted by the published deadline, to be considered during General Assembly.
6. Resolutions received at ENA headquarters will be forwarded to the Resolutions Committee, legal counsel, parliamentarian and ENA Board of Directors for review for compatibility with ENA's purpose, mission, values, objectives, bylaws and standing rules, federal and state laws and financial feasibility.
7. Resolutions that do not comply shall be returned to the authors with explanation.
8. Proposed resolutions submitted will be reviewed by the ENA Board of Directors for possible implementation prior to General Assembly.
9. The Resolutions Committee shall work with authors to combine proposed resolutions that have the same or similar subject matter.
10. Resolutions brought before the General Assembly shall include the exact text of the proposal along with the financial considerations and operational implications. They may also include comments from the Resolutions Committee and the ENA Board of Directors.

BYLAWS AMENDMENT PROPOSALS

11. Bylaws amendment proposals received at ENA headquarters will be forwarded to the Resolutions Committee, legal counsel, parliamentarian and ENA Board of Directors for review for compatibility with ENA's purpose, mission, values, objectives, bylaws and standing rules, federal and state laws and financial feasibility.
12. Bylaws amendment proposals that do not comply shall be returned to the authors with explanation.
13. The Resolutions Committee shall work with authors to combine proposed bylaws amendments that have the same or similar subject matter.
14. Proposals to amend the ENA Bylaws shall include the exact text of the proposal. They may also include comments from the Resolutions Committee and ENA Board of Directors.

MISCELLANEOUS

15. The Resolutions Committee shall be authorized to correct article and section designations, punctuation and references in the Bylaws, Election Rules, and General Assembly Standing Rules of Procedure as may be necessary to reflect the intent of the General Assembly.
16. The draft General Assembly minutes shall be sent electronically to all state captains and the ENA Board of Directors for a 10-day review and comment period. The minutes shall be subsequently approved by the Resolutions Committee.
17. The status of resolutions adopted by the General Assembly will be made available to the ENA membership.

2020–2025 Emergency Nurses Association **Strategic Plan**

MISSION STATEMENT:

To advance excellence in emergency nursing

CORE VALUES:

Integrity

Evidenced by openness and honesty in decisions, communications and actions

Diversity & Inclusion

Evidenced by an organization that creates a culture and climate of mutual respect, inclusivity, and equity

Collaboration

Evidenced by a professional community characterized by mutual respect, service to the benefit of others, and appreciation of our members' contributions

Excellence

Evidenced by a culture of inquiry dedicated to innovation, compassion, and global commitment to best practice

Credo

Derived from the vision of our co-founders Judith Kelleher and Anita Dorr, our priorities are guided by these values and beliefs:

- Inclusion and the contributions of nursing, in **collaboration** with healthcare partners worldwide, help explore **innovative** solutions to the challenges of emergency care delivery.
- **Compassion** is an essential element of the emergency nursing profession.
- We should embrace **inclusion, diversity and mutual respect** in all interactions and initiatives to promote the essential value of different perspectives and experiences within emergency nursing.
- A team-based delivery of resources meet the highest quality standards of **excellence** for patients and emergency nurses.
- Emergency care evolves through **lifelong learning and a culture of inquiry** for the discovery and integration of evidence-based research into emergency nursing practice.
- Our Code of Ethics establishes and encourages adherence to principles of **honesty and integrity**.
- The **spirit of philanthropy** allows the advancement of the profession of emergency nursing and improves the lives of patients throughout the world.
- We place the highest **value on our members for their contributions** to the care of patients and their families, the emergency nursing profession, and our organization.

Vivid Description of an Envisioned Future

VISION

Be the premier organization for the emergency nursing community worldwide

VIVID DESCRIPTION

Emergency Nurses

- Emergency nurses practicing worldwide have the appropriate evidence-based resources needed to provide the best care possible
- Emergency nurses globally have access to high quality education and resources to provide excellent care
- Emergency nurses are working in an ideal practice environment
- Emergency nurses provide care using their full scope of practice
- Every emergency nurse receives the highest level of specialized training and education offered

ENA as an organization

- ENA is recognized as the preeminent worldwide resource in emergency nursing
- ENA is indispensable to the global community
- All emergency nurses are members of the ENA community
- ENA is the primary source of evidence-based emergency nursing resources and standards of care

Patients

- All patients (children, adults, seniors) receive high quality, specialized emergency care in all settings
- Lower morbidity and mortality is demonstrated for emergency patients as a result of leading-edge emergency nursing education and training provided by ENA
- Patients receive expedited ED visits with streamlined admission to needed inpatient beds

The Public

- Legislators appreciate and advocate for the knowledge and depth of care provided in the ED
- Emergency nurses provide a key voice in public health epidemics
- Communities are educated on injury prevention to avoid preventable visits to the ED

Goals, Objectives & Strategies

PRACTICE ENVIRONMENT GOAL:

EMERGENCY NURSES WILL WORK IN AN IDEAL PRACTICE ENVIRONMENT TO PROVIDE THE HIGHEST QUALITY OF EMERGENCY CARE IN THE SAFEST WAY.

Objectives:

1. Improve quality and safety in emergency nursing practice
2. Prevent violence in the ED
3. Establish and disseminate standards for emergency nursing practice
4. Improve recruitment and retention of emergency nurses

Strategies:

1. Develop and compile comprehensive institutional safety assessment and quality measures for emergency nursing
2. Lead efforts to develop and disseminate data and resources to address workplace violence
3. Establish and disseminate standards for emergency nurses to provide care using their full scope of practice
4. Identify and disseminate best practices for emergency nursing staffing
5. Generate and promote new knowledge in emergency nurse wellness
6. Advocate for emergency departments to have the necessary resources and supplies for the highest quality, safe practice and safe care

EDUCATION GOAL:

EMERGENCY NURSES HAVE THE HIGHEST QUALITY EDUCATIONAL RESOURCES TO PROVIDE THE HIGHEST LEVEL OF CARE.

Objectives:

1. Expand research to increase the generation of new knowledge in emergency nursing
2. Expand the translation of best evidence into emergency nursing practice
3. Increase development and delivery of educational content for emergency nurses worldwide.

Strategies:

1. Identify research opportunities to meet the future needs of emergency nurses
2. Identify and prioritize emergency nursing education gaps
3. Expand ENA core educational offerings for all levels of emergency nurses
4. Create new educational offerings that cover the breadth and depth of emergency nursing
5. Create the framework for the gold standard for emergency nursing orientation
6. Influence academia to include emergency nursing content
7. Ensure relevance of instructional design and delivery for all learners to match how and where they learn

COMMUNITY GOAL:

ENA IS THE AUTHORITY AND PREMIER ORGANIZATION FOR EMERGENCY NURSING WORLDWIDE.

Objectives:

1. Increase membership
2. Increase collaboration and partnerships that advance emergency nursing
3. Increase ENA presence in every ED
4. Expand the impact of the ENA Foundation
5. Expand the voice of the emergency nurse in healthcare policy and public health

Strategies:

1. Evaluate membership categories
2. Strengthen member value proposition
3. Define strategic approach to partnerships and organizations that advance emergency nursing
4. Increase ENA brand and product awareness in EDs
5. Implement education and advocacy strategies for injury prevention and public health issues
6. Develop partnerships and a framework for emergency nurses to respond to disasters

CULTURE GOAL:

ENA'S CULTURE IS DYNAMIC, ENSURING RELEVANCE IN A CHANGING ENVIRONMENT TO ADVANCE THE MISSION.

Objectives:

1. Utilize best-in-class technology to support the development and delivery of leading-edge education, research and practice resources and member engagement
2. Employ best practices in governance and leadership
3. Nurture and grow an organizational culture and talent consistent with ENA's values
4. Manage expenses and resource utilization consistent with ENA's goals and objectives

Strategies:

1. Implement new and emerging technologies to enhance the user experience
2. Identify and implement best practices in governance
3. Strengthen support of State Councils and Chapters to provide best practices in strategic decision making and leadership
4. Implement a comprehensive staff development program
5. Implement actions that advance diversity and inclusivity

INDEPENDENT AUDITOR'S REPORT

To the Finance Committee
of Emergency Nurses Association

Opinion

We have audited the accompanying consolidated financial statements of Emergency Nurses Association and Affiliate (nonprofit organizations), which comprise the consolidated statements of financial position as of December 31, 2022 and 2021, and the related consolidated statements of activities and changes in net assets, functional expenses, and cash flows for the years then ended, and the related notes to the consolidated financial statements (collectively, financial statements).

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Emergency Nurses Association and Affiliate as of December 31, 2022 and 2021, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Emergency Nurses Association and Affiliate and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Adoption of New Accounting Standard

As discussed in Note 2 of the financial statements, for the year ended December 31, 2022, Emergency Nurses Association and Affiliate adopted Accounting Standards Update (ASU) No. 2016-02, *Leases (Topic 842)*. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Emergency Nurses Association and Affiliate's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Emergency Nurses Association and Affiliate's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Emergency Nurses Association and Affiliate's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary information presented on pages 32-42 is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 1 - NATURE OF OPERATIONS

Emergency Nurses Association and Affiliate (Association) consists of Emergency Nurses Association (ENA) and ENA Foundation (ENAF).

ENA is a not-for-profit, professional association whose mission is to advance excellence in emergency nursing. ENA, whose national headquarters is located in Schaumburg, Illinois, was founded in 1970. Paid membership is approximately 38,500.

ENAF was established in 1991 to operate exclusively for charitable, educational, and scientific purposes relating to emergency nursing. ENAF activities benefit emergency nurses, patients, and the public through provision of undergraduate, advance practice, doctoral, and continuing education scholarships and research grants.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) as applicable to not-for-profit organizations.

Principles of Consolidation

The accompanying consolidated financial statements (collectively, financial statements) include the accounts of ENA and ENAF. The sole voting member of ENAF is ENA. Since ENA has control of the ENAF Board of Directors (ENAF Board), U.S. GAAP requires that the financial position and activities of both organizations be consolidated. All significant interorganizational transactions and balances have been eliminated in consolidation.

Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, the Association considers all highly liquid instruments with an original maturity of three months or less to be cash equivalents.

Accounts Receivable

Accounts receivable consists of amounts due from Trauma Nursing Core Courses (TNCC), Emergency Nursing Pediatric Courses (ENPC), the sale of advertising space in various ENA publications, and royalty arrangements with vendors for ENA educational offerings. Management reviews the aging of the course receivables to determine the level of allowance for doubtful accounts to establish against the course receivables. As of December 31, 2022 and 2021, the allowance for doubtful accounts was \$136,937 and \$173,216, respectively. No allowance was deemed necessary for non-course receivables as of December 31, 2022 and 2021.

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Inventory

Inventory, which consists of course manuals and ENA merchandise, is carried at the lower of cost or net realizable value with cost being determined by the first-in, first-out (FIFO) method. As of December 31, 2022 and 2021, no allowance for obsolete or excess inventory was recorded.

Property and Equipment

Property and equipment have been recorded at cost if purchased or at fair value at time of donation if received as a gift. The Association capitalizes property and equipment over \$5,000 that have a useful life of more than one year. Depreciation and amortization of property and equipment is provided over the estimated useful lives of the respective assets on a straight-line basis. Costs of maintenance and repairs that do not improve or extend the useful lives of the respective assets are expensed as incurred. The useful lives of property and equipment for purposes of computing depreciation and amortization are as follows:

Buildings	40 years
Building improvements	30 - 40 years
Equipment	5 years
Program development	3 - 7 years
Furniture and fixtures	15 years
Computer software	3 - 7 years

Investments

Long-term and short-term investments in marketable securities with readily determinable fair values are presented in the financial statements at fair value. Short-term investments are those with a maturity of greater than three months but no more than one year. Long-term investments with a maturity of greater than one year are mutual funds or equity securities. The fair values of investments are based on quoted market prices, when available, for those investments. Both realized and unrealized gains and losses are reported as investment income in the consolidated statement of activities and changes in net assets. The Association's investments are exposed to various risks, such as interest rate, credit, and overall market volatility. Due to these risk factors, it is reasonably possible that changes in the values of investments will occur in near term that will materially affect the amounts reported in the consolidated statements of activities and changes in net assets.

Credits on Customer Accounts

Credits on customer accounts represent overpayments on accounts of ENA course directors relating to course fees. These overpayments are not automatically refunded, but instead are held on the account until the course director provides instruction as to the disposition of the credit. The credits are typically applied to future courses.

Assessments Payable

Assessments payable are amounts due to ENA State Councils and Chapters for their share of paid memberships and course fees. Assessments are calculated and paid quarterly.

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Interest Rate Swap Agreement

The interest rate swap agreement is reflected at fair value in the Association's consolidated statements of financial position and the related portions of the debt being hedged are reflected at an amount equal to its carrying value.

Under U.S. GAAP, not-for-profit entities may elect to use a simplified hedge accounting approach to account for interest rate swap agreements that are entered into for the purpose of economically converting a variable-rate borrowing into a fixed-rate borrowing. Under this approach, the statement of activity charge for interest expense is similar to the amount that would result if the Association had directly entered into a fixed-rate borrowing instead of a variable-rate borrowing and a receive-variable, pay-fixed interest rate swap. The Association elected to use the simplified accounting approach.

Net Assets

Net assets, revenues, gains, and losses are classified based on the existence or absence of donor or grantor-imposed restrictions. Accordingly, net assets and changes therein are classified and reported as follows:

Net Assets Without Donor Restrictions – Net assets available for use in general operations and not subject to donor-imposed restrictions. Currently, the ENA Board of Directors (ENA Board) has designated funds for ENAF endowments as well as to fund projects that fall within the criteria of the ENA spending policy. The ENAF Board has also designated funds for the ENAF endowments.

Net Assets With Donor Restrictions – Net assets subject to donor-imposed restrictions. Some donor-imposed restrictions are temporary in nature, such as those that will be met by the passage of time or other events specified by the donor. Other donor-imposed restrictions are perpetual in nature, where the donor stipulates that resources be maintained in perpetuity. The Association reports contributions restricted by donors as increases in net assets with donor restrictions if they are received with donor stipulations that limit the use of the donated assets. When a donor restriction expires, that is, when a stipulated time restriction ends, or purpose restriction is accomplished, net assets with donor restrictions are reclassified to net assets without donor restrictions and reported in the consolidated statements of activities as net assets released from restrictions.

Concentration of Credit Risk

The Association maintains its cash in bank deposits which, at times, may exceed federally insured limits. The Association's uninsured cash balance was \$1,382,199 and \$903,973 at December 31, 2022 and 2021, respectively. The Association believes it is not exposed to any significant credit risk on cash.

The Association maintains its investment in broker accounts which, at times, may exceed federally insured limits. As of December 31, 2022 and 2021, the Association's uninsured investment balance was \$17,093,326 and \$24,287,184, respectively. The Association believes it is not exposed to any significant credit risk on investments.

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Support and Revenue Recognition

Revenue from Contracts with Customers

The Association derives a significant portion of its revenue from revenue sources that involve contracts with customers. Those sources include courses, membership dues, conferences, publications, marketplace, sponsorships, royalties, special events, mailing lists, and other revenue. Revenue is recognized when control of these goods or services are transferred to its customers, in an amount that reflects the consideration the Association expects to be entitled to in exchange for those goods or services. The Association does not have any significant financing components as all payments are received within a year of the services being provided. Costs incurred to obtain a contract will be expensed as incurred when the amortization period is less than a year. All contracts contain specified pricing for each performance obligation thus allocation of the transaction price is not necessary.

Disaggregation of Revenue from Contracts with Customers

The following table disaggregates the Association's revenue based on the timing of satisfaction of performance obligations for the years ended December 31:

	2022	2021
Performance obligations satisfied at a point in time	\$ 19,583,136	16,494,186
Performance obligations satisfied over time	\$ 5,221,440	5,525,186

Revenues from performance obligations satisfied at a point in time consist of revenues from courses, conferences, publication advertising revenue, marketplace, event sponsorships, special events, mailing lists, and other revenues. Revenues from performance obligations satisfied over time consist of membership dues, publication editorial support and profit sharing, corporate engagement council sponsorships, and royalties.

Performance Obligations

For performance obligations related to courses, control transfers to the customer at a point in time. Courses occur on specified dates and course fee revenue is recorded when the course is held. Revenue from the sale of manuals is recognized upon shipment to the customer.

For performance obligations related to membership dues, control transfers to the customer over time. The Association offers membership categories of one year, three years, five years, and lifetime. Revenue is recorded in equal installments as control is passed to the customer over the term of the membership. The Association has determined that the average career span of an emergency professional is thirteen years and recognizes lifetime memberships over a thirteen-year period.

For performance obligations related to conferences, control transfers to the customer at a point in time. Conferences occur at specified dates and revenue is recorded at the time the conference is held.

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Support and Revenue Recognition, Continued

Performance Obligations, Continued

For performance obligations related to publication advertising revenue, control transfers at a point in time. Revenue is recorded at the time the advertisement is printed or advertising service is performed. For performance obligations related to publication editorial support and profit sharing, control transfers to the customer over time in equal installments as control is passed to the publisher over the term of the agreement.

For performance obligations related to marketplace, control transfers to the customer at a point in time. Revenue from marketplace is recognized upon shipment of goods to customers.

For performance obligations related to event sponsorships and special events, control transfers to the customer at a point in time. Events occur at specified dates and revenue is recorded at the time the event is held. For performance obligations related to corporate engagement council sponsorships, control transfers to the customer over time. All obligations associated with corporate engagement council sponsorships are satisfied in the year in which the contract was obtained.

For performance obligations related to royalty revenue, control transfers to the customer over time. The Association recognizes royalty revenue using the output method based on terms agreed upon in contracts established with customers. The Association receives a percentage of gross income in exchange for a customer's usage of the Association's name and logo. The Association also receives commissions based on net revenue generated for promotion of a job board on the Association's website.

For performance obligations related to mailing lists and other revenues, control transfers to the customer at a point in time.

Conference fees received in advance are deferred until the conference takes place. Course fees received in advance are deferred until the course takes place. Membership dues received in advance are deferred until the period to which the dues relate. The deferred amounts as of December 31, 2022 and 2021 are included in deferred revenue on the consolidated statements of financial position.

Contract Balances

The timing of revenue recognition, billings, and cash collections results in billed accounts receivable and deferred revenue on the consolidated statements of financial position. The beginning and ending contract balances were as follows:

	<u>December 31, 2022</u>	<u>December 31, 2021</u>	<u>January 1, 2021</u>
Accounts receivable	\$ 1,982,254	1,608,291	1,797,191
Deferred revenue	\$ 4,813,601	3,898,045	3,960,948

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Support and Revenue Recognition, Continued

Promises to Give

The Association recognizes contributions when cash, securities or other assets, an unconditional promise to give, or a notification of a beneficial interest is received. Conditional promises to give, that is, those with a measurable performance or other barrier, and a right of return, are not recognized until the conditions on which they depend have been substantially met. As of December 31, 2022 and 2021, there were no conditional promises to give. Contributions not collected at the end of the year are disclosed as pledges receivable and are recorded at their estimated fair values. They are subsequently valued at the present value of future cash flows. All contributions are expected to be collected in one year or less.

Employee Retention Credit

The provisions of the Coronavirus Aid, Relief, and Economic Security Act (the CARES Act) provides an employee retention credit (ERC), which is a refundable tax credit against certain employment taxes for eligible employers. Management determined the Association qualifies for the ERC and has elected to treat the credit consistent with the treatment of conditional grants. The Association recorded a receivable and ERC grant revenue once the measurable performance or other barrier and right of return of the ERC had been overcome. The Association has recognized \$1,283,954 as ERC grant revenue for the years ended December 31, 2022. The Association has a related receivable balance of \$1,283,954 as of December 31, 2022 included in other receivables on the consolidated statements of financial position. The Association has filed for refunds of the ERC and subsequent to year end has received the funds.

Accounting Estimates

The preparation of consolidated financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Income Taxes

ENA and ENAF are exempt from federal and state income taxes under Internal Revenue Code Section 501(c)(3). ENA pays unrelated business income tax (UBIT) on advertising revenue derived from various ENA publications, as well as sponsorship revenue that provide marketing opportunities for the sponsor. Unrelated business income tax (UBIT) for the years ended December 31, 2022 and 2021 amounted to \$63,055 and \$11,869, respectively. Provision for UBIT expense is included in programs, grants, and scholarship expense on the consolidated statements of functional expenses.

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Income Taxes, Continued

Management has concluded that as of December 31, 2022 and 2021, there were no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Association would account for any potential interest or penalties related to possible future liabilities for unrecognized income tax benefits as income tax expense. The Association is no longer subject to examination by federal, state, or local tax authorities for periods before 2019.

Advertising

Advertising costs are expensed as incurred. Advertising expense was \$132,274 and \$121,191 for the years ended December 31, 2022 and 2021, respectively, and is included with miscellaneous expenses in the consolidated statements of functional expenses.

Functional Expenses

The costs of program and supporting service activities have been summarized on a functional basis in the consolidated statements of activities. The consolidated statements of functional expenses present the natural classification detail of expenses by function. Accordingly, certain costs have been allocated among the programs and supporting services benefited.

The consolidated financial statements report certain categories of expenses that are attributable to more than one program or supporting function. Therefore, expenses require allocation on a reasonable basis that is consistently applied. The Association utilizes a direct coding methodology for a majority of their expenses, however, expenses classified as occupancy expenses on the consolidated statements of functional expenses are allocated on the basis of estimates of time and effort.

Change in Accounting Principles – Contributed Nonfinancial Assets

In September 2020, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2020-07, Presentation and Disclosure by Not-for-Profit Entities for Contributed Nonfinancial Assets. The ASU improves financial reporting by providing new presentation and disclosure requirements, including presenting contributed nonfinancial assets (in-kind contributions) as a separate line item in the consolidated statements of activities apart from contributions of cash and other financial assets. The ASU also requires additional qualitative and quantitative disclosures about the nature, amount, restrictions, and policies surrounding the contributed nonfinancial assets. For the year ended December 31, 2022, the Association adopted the ASU on a retrospective basis and has adjusted the presentation in these financial statements accordingly.

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Adoption of New Accounting Standard – Leases

In February 2016, FASB issued ASU No. 2016-02, Leases (Topic 842). The FASB also subsequently issued additional ASUs, which amend and clarify Topic 842. The most significant change in the new leasing guidance is the requirement to recognize right-of-use (ROU) assets and lease liabilities for operating leases on the consolidated statement of financial position. ASU No. 2016-02 is effective for fiscal years beginning after December 15, 2021.

The Association elected to adopt these ASUs effective January 1, 2022 and utilized the available practical expedients. As a result of adoption, the Association recorded ROU assets and lease liabilities of \$452,799 effective January 1, 2022.

Leases

The Association leases office space and equipment. The determination of whether an arrangement is a lease is made at the lease's inception. Under ASC 842, a contract is (or contains) a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is defined under the standard as having both the right to obtain substantially all of the economic benefits from use of the asset and the right to direct the use of the asset. Management only reassesses its determination if the terms and conditions of the contract are changed.

Operating leases are included in operating lease right-of-use ("ROU") assets and other current and long-term operating lease liabilities in the consolidated statements of financial position. Finance leases are included in property and equipment, other current liabilities, and other long-term liabilities in the consolidated statements of financial position.

ROU assets represent the right to use an underlying asset for the lease term, and lease liabilities represent the obligation to make lease payments. Operating lease ROU assets and liabilities are recognized at the lease commencement date based on the present value of lease payments over the lease term. The Association uses the implicit rate when it is readily determinable. Since most of the Association's leases do not provide an implicit rate, to determine the present value of lease payments, management uses the risk free rate based on the information available at lease commencement. Operating lease ROU assets also includes any lease payments made and excludes any lease incentives. Lease expense for lease payments is recognized on a straight-line basis over the lease term. The Association's lease terms may include options to extend or terminate the lease when it is reasonably certain that it will exercise the option.

New Accounting Standard – Credit Losses

In June 2016, the FASB issued guidance to change the accounting for credit losses. The guidance requires an entity to utilize a new impairment model known as the current expected credit loss ("CECL") model to estimate its lifetime "expected credit losses" and record an allowance that presents the net amount expected to be collected on the financial assets. The CECL framework is expected to result in earlier recognition of credit losses. The Association intends to adopt the guidance as of January 1, 2023 and is currently evaluating the effect it is expected to have on its financial statements and related disclosures.

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES, CONTINUED

Management Evaluation of Going Concern

In accordance with U.S. GAAP, management performed an evaluation to determine if adverse conditions or events, considered in the aggregate, raise substantial doubt about the Association's ability to continue as a going concern for the one-year period from the date the financial statements were available to be issued. Management's evaluation did not identify any conditions or events that raise substantial doubt about the Association's ability to continue as a going concern for the period from July 20, 2023 to July 20, 2024.

Subsequent Events

Subsequent events have been evaluated through July 20, 2023, the date that the financial statements were available to be issued.

On January 4, 2023, ENA established a wholly-owned subsidiary under the name ENA Ventures, LLC and on January 5, 2023 amended the articles of organization to change the name of the limited liability company to be ENA WorkWell Solutions, LLC. As of April 13, 2023, ENA WorkWell Solutions, LLC is doing business as Engage - Powered by ENA.

NOTE 3 - LIQUIDITY AND AVAILABILITY

Financial assets available for general expenditure, that is, without donor or other restrictions limiting their use, within one year of the date of the consolidated statement of financial position, comprise the following:

	<u>2022</u>	<u>2021</u>
Financial assets at year-end:		
Cash and cash equivalents	\$ 1,809,627	1,425,562
Accounts receivable, net	1,845,317	1,435,075
Grants receivable	27,673	18,412
Other receivables	1,298,083	67,184
Mortgage receivable	60,844	62,345
Investments	<u>17,300,328</u>	<u>25,267,700</u>
Total financial assets	<u>22,341,872</u>	<u>28,276,278</u>
Less: amounts not available for general expenditures within one year, due to:		
Donor-restricted for a specific purpose	656,155	962,652
Perpetual restrictions	1,385,048	1,265,440
Board-designated endowment	1,649,769	2,015,769
Board-designated for a specific purpose	89,908	131,576
Board-designated reserve fund	<u>501,910</u>	<u>501,910</u>
Total amounts not available for general expenditures within one year	<u>4,282,790</u>	<u>4,877,347</u>
Financial assets available to meet cash needs for general expenditures within one year	<u>\$ 18,059,082</u>	<u>23,398,931</u>

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 3 - LIQUIDITY AND AVAILABILITY, CONTINUED

The Association's endowment funds consist of donor-restricted endowments. Income from donor-restricted endowments is restricted for specific purposes. As of December 31, 2022 and 2021, donor restricted endowment funds were not available for general expenditure.

The Association's board-designated endowment of \$1,649,769 and \$2,015,769 at December 31, 2022 and 2021, respectively, is subject to an annual spending rate of 5% as described in Note 13. Although the Association does not intend to spend from this board-designated endowment (other than amounts appropriated for general expenditure as part of the ENAF Board's annual budget approval and appropriation), these amounts could be made available if necessary.

During 2020, the ENAF Board designated funds for utilizing reserves to support COVID-19 relief and in December 2022, the ENAF Board re-designated the purpose of the COVID Relief Fund to an Emergency Relief Fund. At December 31, 2022 and 2021, there was a balance of \$89,908 and \$131,576, respectively, with this designation. Although the Association intends to spend these funds in support of emergency relief, these amounts could be made available if necessary.

Additionally, the ENA Board has designated funds within the parameters of the ENA spending policy for utilizing reserves on identified projects. At December 31, 2022 and 2021 there was a balance of \$501,910 with this designation. Although the Association intends to spend these funds in accordance with the ENA spending policy referred to above, these amounts could be made available if necessary.

As part of the Association's liquidity management plan, cash in excess of current needs for expenses is invested in mutual funds. Investments are released to cover operating expenses as needed upon management approval. Additionally, the Association maintains a line of credit that if deemed necessary can be drawn upon to cover operating expenses (Note 8).

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 4 - PROPERTY AND EQUIPMENT

Property and equipment at December 31, 2022 and 2021 consisted of the following:

	<u>2022</u>	<u>2021</u>
Land	\$ 1,492,112	1,492,112
Buildings	2,948,699	2,948,699
Building improvements	5,969,138	5,969,138
Equipment	178,598	281,744
Program development	1,246,992	1,308,564
Furniture and fixtures	1,283,098	1,297,834
Computer software	<u>5,122,465</u>	<u>5,560,296</u>
Total property and equipment	18,241,102	18,858,387
Less accumulated depreciation	<u>(5,509,359)</u>	<u>(6,776,122)</u>
Property and equipment, net	<u>\$ 12,731,743</u>	<u>12,082,265</u>

Depreciation expense of property and equipment was \$498,019 and \$544,434 for the years ended December 31, 2022 and 2021, respectively. In addition, the Association amortized development costs (included in programs, grants, and scholarship expenses) for the years ended December 31, 2022 and 2021 in the amounts of \$270,204 and \$201,577, respectively.

NOTE 5 - MORTGAGE RECEIVABLE

On August 21, 2020, the Association entered into a real estate sale agreement with a third party. The Association agreed to provide financing for a portion of the purchase price of the property sold, which amounted to \$1,900,000. The mortgage receivable is stated at unpaid principal balance, less an allowance for loan losses. As of December 31, 2022 and 2021, an allowance was not deemed necessary. Certain insurance coverage is required and the policies must name the Association as additional insured.

Interest on the note is compounded annually and accrues at a rate of 4.00% from September 1, 2021 through August 31, 2023 and at a rate of 5.00% from August 31, 2023 through the maturity date. Interest on the loan is recognized over the term of the loan and is calculated using the interest method on principal amounts outstanding. Interest income recorded for the years ended December 31, 2022 and 2021 was \$71,662 and \$30,499, respectively, and is included as other support and revenue on the consolidated statements of activities. The Association's practice is to charge off any loan or a portion of a loan when the loan is determined by management to be uncollectible due to the third party's failure to meet repayment terms, or for other reasons.

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 6 - SPLIT-DOLLAR LIFE INSURANCE AGREEMENT

On April 1, 2022, the Association entered into a collateral assignment split-dollar agreement and limited recourse term promissory note with a key employee of the Association to encourage the employee to continue employment and to provide insurance protection, as well as additional retirement income, for the benefit of the employee. The Association and employee jointly own a life insurance policy (Policy). The limited recourse term promissory note accrues interest at a rate of 2.25% per annum compounded annually and the Policy is assigned as collateral, which secures the Association's right to recover the funding amount plus interest. Commencing December 31, 2029, the employee has the right to draw excess cash value earnings from the Policy, up to the vested annual borrowing cap. The employee will be 100% vested in her borrowing rights if employed through December 31, 2029.

Beginning in 2022 and ending in 2029, the Association will make eight annual premium payments to the insurance company in the amount of \$112,488 per year. Interest income is recognized as earned and accrued for in split dollar life insurance on the consolidated statements of financial position. The balance of the split dollar life insurance as of December 31, 2022 comprised of the following:

Initial principal amount	\$ 899,904
Accrued interest	<u>15,186</u>
Total split dollar life insurance	<u><u>\$ 915,090</u></u>

NOTE 7 - FAIR VALUE MEASUREMENTS

U.S. GAAP establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

The three levels of the fair value hierarchy are described below:

- | | |
|---------|--|
| Level 1 | Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that management has the ability to access at the measurement date. |
| Level 2 | Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly such as: <ul style="list-style-type: none"> • Quoted prices for similar assets or liabilities in active markets; • Quoted prices for identical or similar assets or liabilities in inactive markets; • Inputs other than quoted prices that are observable for the asset or liability; • Inputs that are derived principally from or corroborated by observable market data by correlation or other means. |

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 7 - FAIR VALUE MEASUREMENTS, CONTINUED

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2022 and 2021.

Mutual funds: Valued at the closing price as reported by the fund. Mutual funds held by the Association are open-ended mutual funds that are registered with the U.S. Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price.

Interest rate swap: Valued using both observable and unobservable inputs when available and can generally be corroborated by market data.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while management believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the Association's assets at fair value as of December 31, 2022 and 2021:

	Assets at Fair Value as of December 31, 2022			
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Assets:				
Mutual funds:				
Money market funds	\$ 521,780	-	-	521,780

Exchange traded funds	7,615,662	-	-	7,615,662
Interest rate swap	-	257,642	-	257,642
Total assets in the fair value hierarchy	<u>\$ 18,087,744</u>	<u>257,642</u>	<u>-</u>	<u>18,345,386</u>

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 7 - FAIR VALUE MEASUREMENTS, CONTINUED

	Assets at Fair Value as of December 31, 2021			
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Assets:				
Mutual funds:				
Bond funds	\$ 3,773,408	-	-	3,773,408
Equity funds	11,022,113	-	-	11,022,113
Exchange traded funds	<u>10,472,179</u>	<u>-</u>	<u>-</u>	<u>10,472,179</u>
Total assets in the fair value hierarchy	<u>\$ 25,267,700</u>	<u>-</u>	<u>-</u>	<u>25,267,700</u>
Liability:				
Interest rate swap	<u>\$ -</u>	<u>705,820</u>	<u>-</u>	<u>705,820</u>

As of December 31, 2022, \$787,416 of the \$18,087,744 of investments are earmarked for the collateral assignment split-dollar agreement and are included in split-dollar life insurance asset on the consolidated statement of financial position.

For the years ended December 31, 2022 and 2021, there were no significant transfers into or out of Level 3.

NOTE 8 - LINE OF CREDIT

The Association has a \$2,500,000 unsecured line of credit. This line expires on December 21, 2023 and bears interest at prime (7.50% at December 31, 2022) minus .75%. The outstanding balance on the line of credit was \$1,099,209 at December 31, 2022 and 2021.

Restrictive covenants imposed under the line of credit require the Association to maintain an unrestricted cash and investment to total fund debt of not less than 1.25 (ENA only). As of December 31, 2022 and 2021, this covenant was met.

NOTE 9 - BOND PAYABLE

On December 21, 2017, a Series 2017 Industrial Revenue Bond (Bond) was issued by the City of Watseka. The aggregate principal amount of the Bond is \$10,000,000 and the proceeds of the Bond were used to finance the purchase of the land and building in Schaumburg, IL. The maturity date of the Bond is December 21, 2047.

The Bond bears interest at variable rates throughout the life of the bond. As of December 31, 2022, the interest rate on the Bond is 4.69%. The Bond requires monthly payments of \$28,736.

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 9 - BOND PAYABLE, CONTINUED

The Bond agreement requires the Association to furnish audited financial statements 270 days after each year end. Restrictive covenants imposed under the Bond agreement also require the Association to maintain an unrestricted cash and investment to total fund debt of not less than 1.25 (ENA only). As of December 31, 2022 and 2021, this covenant was met.

There were debt issuance costs of \$123,194 related to the bond issuance. Amortization expense for the years ended December 31, 2022 and 2021 was \$6,973 and \$7,246, respectively.

During 2018, the Association entered into a \$10,000,000 interest rate swap agreement with a bank to fix the rate on the variable rate bond and to manage the borrowing costs. The interest rate swap agreement has a termination date of December 10, 2027 and a fixed interest rate of 3.61%.

The settlement value of the interest rate swap at December 31, 2022 was an asset of \$257,642 and at December 31, 2021 was a liability of \$705,820. The settlement rate was estimated using a present value calculation of the swap's remaining estimated cash flows, not adjusted for any nonperformance risk.

The Bond payable as of December 31, 2022 and 2021 consisted of the following:

	2022			2021		
	PRINCIPAL	DEBT ISSUE COSTS	NET	PRINCIPAL	DEBT ISSUE COSTS	NET
Bond	\$ 8,620,672	85,599	8,535,073	8,965,504	92,572	8,872,932
Less current portion	<u>(344,832)</u>	<u>(6,700)</u>	<u>(338,132)</u>	<u>(344,832)</u>	<u>(6,973)</u>	<u>(337,859)</u>
Long-term debt	<u>\$ 8,275,840</u>	<u>78,899</u>	<u>8,196,941</u>	<u>8,620,672</u>	<u>85,599</u>	<u>8,535,073</u>

Principal payments due on Bond payable during each of the next five years are as follows:

2023	\$ 344,832
2024	344,832
2025	344,832
2026	344,832
2027	344,832
Thereafter	<u>6,896,512</u>
Total	<u>\$ 8,620,672</u>

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 10 - LEASES

As of and for the Year ended December 31, 2022

The Association has operating lease agreements that require monthly payments ranging from \$144 to \$6,793, and lease maturity dates up through November 2027. The Association is not obligated by any lease agreements that meet the criteria of a finance lease.

Certain leases include optional renewal periods. When it is reasonably certain that a renewal option will be exercised that renewal period is included in the lease term, and the related payments are reflected in the ROU asset and lease liability.

All of the Association's leases include fixed rental payments. While the majority of the leases are gross leases, the Association also has a number of leases which require separate payments to the lessor based on the property taxes assessed on the property, as well as a portion of the common area maintenance associated with the property. The Association has elected the practical expedient not to separate lease and nonlease components for all leases.

The Association elects to apply the short-term lease measurement and recognition exemption to leases that meet the criteria. As of December 31, 2022, the Association had not entered into any lease agreements that qualify for the short-term lease measurement and recognition exemption.

Lease expense for the year ended December 31, 2022 was as follows:

Operating leases:	
Fixed rent expense	\$ <u>92,567</u>

Aggregate future minimum lease payments and the present value of net future minimum payments at December 31, 2022 is as follows:

2023	\$ 88,123
2024	90,118
2025	87,345
2026	82,703
2027	<u>21,958</u>
	370,247
Less interest	<u>(10,194)</u>
	<u>\$ 360,053</u>

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 10 - LEASES, CONTINUED

As of and for the Year ended December 31, 2022, Continued

As of December 31, 2022, the weighted-average remaining lease term for all operating leases is 4.13 years. Because the Association generally does not have access to the rate implicit in the lease, the Association utilizes the risk free rate as the discount rate. The weighted-average discount rate associated with operating leases as of December 31, 2022 is 1.36%.

As of and for the Year ended December 31, 2021

The Association was obligated under operating leases, primarily for certain office space and office equipment which expire on various dates through 2026. Total rent expense under these leases amounted to \$101,585 for the year ended December 31, 2021 and is included with rent and supplies and equipment expenses in the consolidated statements of functional expenses.

NOTE 11 - RETIREMENT PLAN

ENA has a 401(k) defined contribution retirement savings plan (Plan) available to substantially all of ENA's employees. ENA matches up to 4% of each employee's contribution to the Plan. The Plan also has a discretionary profit-sharing component. ENA's discretionary profit-sharing contribution is determined annually based on the fiscal results of the Association with input from staff and the Board. Based on ENA's financial performance in 2021, the profit-sharing contribution was given to each of the qualified employees of 5%, which was paid in 2022. In 2022, there was no profit-sharing contribution. ENA's contribution is funded on a current basis. Total contributions to the Plan for the years ended December 31, 2022 and 2021 totaled \$321,253 and \$716,175, respectively.

NOTE 12 - COMMITMENTS AND CONTINGENCIES

The Association has entered into a number of contracts with various vendors for space, hotel accommodations, and ancillary services for future meetings. Prepaid hotel deposits may be applied towards hotel cancellation fees. Minimum estimated cancellation fees for future meetings as of December 31, 2022 are as follows:

2023	\$ 1,147,850
2024	3,056,382
2025	469,505
2026	240,993
2027	-
Thereafter	<u>884,032</u>
Total	<u>\$ 5,798,762</u>

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 12 - COMMITMENTS AND CONTINGENCIES, CONTINUED

The \$1,938,315 Paycheck Protection Program (PPP) loan (loan 1), \$1,938,315 second PPP loan (loan 2), and their forgiveness are subject to examination under the terms of the agreement with the Small Business Administration for a period of six years from the date the PPP loans are forgiven, which was March 2021, for loan 1 and November 2021 for loan 2. The Association is not currently under examination nor has the Association been contacted.

NOTE 13 - ENDOWMENT

The Association's endowment includes three board-designated endowments established for the ENAF and twenty one donor-restricted endowment funds primarily for the general operating purposes of the Association, as well as for specific programs and scholarships. Net assets associated with endowment funds are classified and reported based on the existence or absence of donor-imposed restrictions.

Interpretation of Relevant Law

The State of Illinois adopted the Uniform Prudent Management of Institutional Funds Act (UPMIFA) on June 30, 2009. The board of directors has adopted a spending policy that requires the preservation of the fair value of the original gift as of the gift date of the donor-restricted endowment fund absent explicit donor stipulations to the contrary.

As a result of this policy, the Association retains in perpetuity (a) the original value of initial and subsequent gift amounts (including promises to give net of any discounts or an allowance for uncollectible pledges) donated to the endowment and (b) any accumulations to the endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added. Donor-restricted amounts not retained in perpetuity are subject to appropriation for expenditure by the Association in a manner consistent with the standard of prudence described by UPMIFA. The Association considers the following factors in making a determination to appropriate or accumulate donor-restricted endowment funds:

- The duration and preservation of the fund
- The purposes of the Association and the donor-restricted endowment fund
- General economic conditions
- The possible effect of inflation and deflation
- The expected total return from income and the appreciation of investments
- Other resources of the Association
- The investment policies of the Association

Strategies Employed for Achieving Objectives

To satisfy its long-term rate of return objectives, the Association relies on a total return strategy in which investment returns are achieved through both capital appreciation (realized and unrealized) and current yield (interest and dividends).

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 13 - ENDOWMENT, CONTINUED

Spending Policy and How the Investment Objectives Relate to Spending Policy

The Association's board has approved a policy of appropriating annually no more than 5% of the prior three-year average of the fair market value of the endowment, including any capital appreciation and/or current yield. In establishing this policy, the Association considered the long-term expected return on its endowments. This is consistent with the Association's objective to maintain the fair value of the endowment assets held in perpetuity for a specified term as well as to provide additional real growth through new gifts and investment return. Donor-restricted endowments are spent in accordance with the donors' requirements; distributions are made for purposes that conform to the donors' stated intentions.

Funds with Deficiencies

From time to time, certain donor-restricted endowment funds may have fair values less than the amount required to be maintained by donors or by law (underwater endowments). There were no such deficiencies at December 31, 2022 and 2021.

Endowment net asset composition by type of fund as of December 31, 2022:

	<u>Without Donor Restrictions</u>	<u>With Donor Restrictions</u>	<u>Total</u>

Net assets were released from donor restrictions by incurring expenses satisfying the restricted purpose or by occurrence of the passage of time or other events specified by the donors as follows for the years ended December 31, 2022 and 2021:

	<u>2022</u>	<u>2021</u>
Scholarships	\$ 264,089	242,330
Emergency Relief Fund (COVID-Relief)	<u>-</u>	<u>27,512</u>
Total net assets released from restrictions	<u>\$ 264,089</u>	<u>269,842</u>

**EMERGENCY NURSES ASSOCIATION AND AFFILIATE
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2022 AND 2021**

NOTE 15 - PAYCHECK PROTECTION PROGRAM LOAN

On April 5, 2020, the Association received proceeds in the amount of \$1,938,315 under the PPP established as part of the Coronavirus Aid, Relief and Economic Security Act (CARES Act). PPP loans and accrued interest are forgivable to the extent the criteria established in the CARES Act are met.

Pursuant to the 2021 Consolidated Appropriations Act (CAA), the Association applied for a \$1,938,315 PPP2 loan and received the proceeds on February 1, 2021. The PPP2 loan and accrued interest are forgivable to the extent the criteria established in the CAA are met.

Given Congress' intent to have the proceeds of the PPP loans forgiven by meeting specific criteria, the Association has elected to treat the PPP loans in accordance with the conditional government grants model in accordance with FASB ASC 958-605. The Association initially recorded the loan as a refundable advance and subsequently recognized PPP grant revenue in accordance with the guidance for conditional government grants; that is, once the measurable performance or other barrier and right of return of the PPP loan no longer existed. The Association has recognized \$1,938,315 and \$1,938,315 as PPP grant revenue for the years ended December 31, 2021 and 2020, respectively.

NOTE 16 - RECLASSIFICATIONS

Certain amounts in the 2021 financial statements have been reclassified to conform to the December 31, 2022 presentation.

15. Debra Duncan, BSN, BA, AND, RN, CEN, CPEN	Alternate	IN	1/1/23 – 12/31/23

Board Liaison: Rachael Smith**Staff Liaison:** Ellen Siciliano**2023 Charges:**

1. Encourage award application submission.
2. Review awards and their applicable criteria and provide recommendations for revisions.
3. Review and score eligible candidate applications.

2023 Specific Criteria:

- Must be able to participate in reviewer training and utilize the electronic award scoring tool
- Experience at a state or chapter level at ENA
- ~~Ability to serve for a two-year term~~ *Requested to change to “Ability to serve for a two- or three-year term depending on the needs of the committee.*
 - ⊖ *Rationale for this change: The term for 8 out of the 12 members is expiring at the end of 2023. Once the below tiered approach is complete, we can then return to the two-year terms for all. To avoid this large number of vacancies in the future, the call for volunteers would go as the follows:*
 - *2-year term for 4 members*
 - *3-year term for 4 members*
- No onsite meeting required
- *In alignment with ENA’s DEI Mission and Vision Statements, all members of committees who make member and/or award selection decisions will be required to complete an ENA-provided implicit bias training.*
