FOLLOW US    

The Emergency Nurses Association (ENA) is the premier professional nursing association dedicated to defining the present and future of emergency nursing through advocacy, education, research, innovation, and leadership. Founded in 1970, ENA has proven to be an indispensable resource to the global emergency nursing community. With more than 50,000 members worldwide, ENA is committed to care — advocating for patient safety, developing industry-leading practice standards and guidelines, and influencing emergency health care public policy. ENA members have expertise in all aspects of emergency nursing, including patient care, public health emergencies, triage, opioid crises, human trafficking, behavioral health, injury prevention, trauma care, and disaster preparedness.

On the frontline of health care, ENA advocates to advance excellence in emergency nursing. We take on critical challenges that impact the delivery of emergency health care. When policies important to emergency nurses are debated and implemented, we speak as the leading emergency nursing authority, representing thousands of members with diverse areas of expertise worldwide. Our knowledge and leadership, acquired over generations of service, results in positive, impactful change in all areas of emergency nursing.

Supporting and Advancing All Facets of Emergency Nursing

EDUCATION

ENA's goal is to ensure nurses and hospitals have access to reliable, relevant education to help nurses and care teams stay at the forefront of a rapidly evolving specialty. ENA's **Trauma Nursing Core Course (TNCC)**, **Emergency Nursing Pediatric Course (ENPC)**, **Geriatric Emergency Nursing Education Course (GENE)**, **Course in Advanced Trauma Nursing (CATN)**, and **CEN Online Review** and newly released **introductory-level courses** and **Emergency Severity Index triage course (ESI)** are a few examples of our core education offerings that provide the knowledge and skills needed to enhance the practice of nursing. ENA is accredited as a provider of nursing continuing professional development by the American Nurses Credentialing Center's Commission on Accreditation.

PREMIER PUBLICATIONS

ENA offers an array of publications providing the most up-to-date information on emergency nursing. *ENA Connection* magazine features ENA news and trends in emergency nursing. The highly-acclaimed *Journal of Emergency Nursing* features peer-reviewed and evidence-based articles on emergency nursing practice and professional issues, as well as original research and topical discussions.

PRACTICE & RESEARCH

ENA provides subject matter expertise and a concentrated focus on issues related to practice, quality, safety, injury prevention, and wellness. The Association collaborates with local, regional, and national organizations on topics and projects relevant to emergency nursing. Resources including Position Statements, Topic Briefs, Toolkits, and Infographics provide information on practice issues relevant to emergency nurses.

ENA also advances the field of emergency nursing and care through evidence-based research and resources written by nurses for nurses. ENA has produced landmark research on workplace violence and management of behavioral health patients in the emergency department.

ENA's evidence-based Clinical Practice Guidelines can be used in clinical settings to ensure a higher quality of patient care.

Advanced practice nurses benefit from education, resources, networking, and skill development that is targeted to their unique needs. ENA

recognizes the importance of addressing these needs through collaboration and engagement around advanced practice issues.

GOVERNMENT RELATIONS

Just as emergency nurses are advocates for safety and quality in patient care, ENA is an equally determined advocate on legislative and regulatory issues affecting emergency nurses and patients. ENA's Government Relations team regularly meets with elected officials, tracks legislation affecting emergency nurses, and spearheads grassroots lobbying efforts through the EN411 Action Network.

ENA's Government Relations team:

- Advocates for quality patient care, injury prevention, and health care preparedness
- Represents the interests and concerns of emergency nurses
- Provides a strong, unified voice for emergency nursing through legislative and regulatory advocacy

ENA FOUNDATION

The ENA Foundation, the philanthropic arm of ENA, advances the emergency nursing profession by providing academic scholarships, professional development, and research grants to emergency nurses. Program funding is made possible by generous contributions from ENA members, state councils, chapters, corporations, and friends of emergency nursing.

ENA STATE COUNCILS AND CHAPTERS

ENA represents over 200 state councils and chapters who provide leadership and programming at the local level. Many of these councils and chapters have been instrumental in changing local laws that impact nursing in the ED. ENA's General Assembly represents all states and creates policies and guideline recommendations in support of the ENA Mission and Vision.

ENA EVENTS

ENA hosts the largest conference dedicated to emergency nursing professionals from across the globe. This annual Emergency Nursing Conference delivers industry-leading education from experts in the field on timely topics that nurses can take back and implement into their practice immediately.
