

ESI 3.0 provides nurses the tools needed to properly assess patients to optimize patient flow, ensure timely and appropriate care, and improve patient outcomes.

Includes:

- Knowledge checks
- Case examples and application
- Post-course test with correct answer rationals
- Downloadable resources
- Interactive learning module

The ESI algorithm is used by approximately 94% of U.S. hospitals

TRIAGE CURRICULUM

ENA Triage Curriculum provides an emergency nurse a range of foundational knowledge needed to accurately triage patients.

“This course taught me to recognize the importance of cultural awareness when caring for patients to ensure that I am recognizing not only their physical needs but their cultural needs as well.”

– ENA Triage Curriculum Participant

In a survey of triage program learners, 100% of respondents said they have successfully applied the techniques learned in ENA's Triage Curriculum into their daily practice.

Topics Covered:

- Introduction to Triage
- Healthcare Law in Triage
- Communication and Patient Experience
- Emergency Severity Index[®] (ESI[®]) 3.0 Online Course
- Symptom Presentations and Triage Assessment
- Special Population Considerations
- Prioritizing
- Triage in Disaster and Mass Casualty Situations

ENTEPTM *New!*

Emergency Nursing Triage Education Program

The First and Only Triage Verification Program for ED nurses.

Includes:

- Independent Study
- Verification Assessment
- Triage scenarios
- Live Instructor-led discussions
- Clinical judgement concepts
- Dedicated discussion of the ESI algorithm to increase triage accuracy and acuity assignment

Receive a 4-year verification card, a digital badge and CNE hours upon successful completion

Receive a digital badge, CNE hours, and 4-year verification card upon successful completion.
